

Death rates by state fitted by month 1982–2013 against t2m days\_decreasing\_by\_5 : female 15

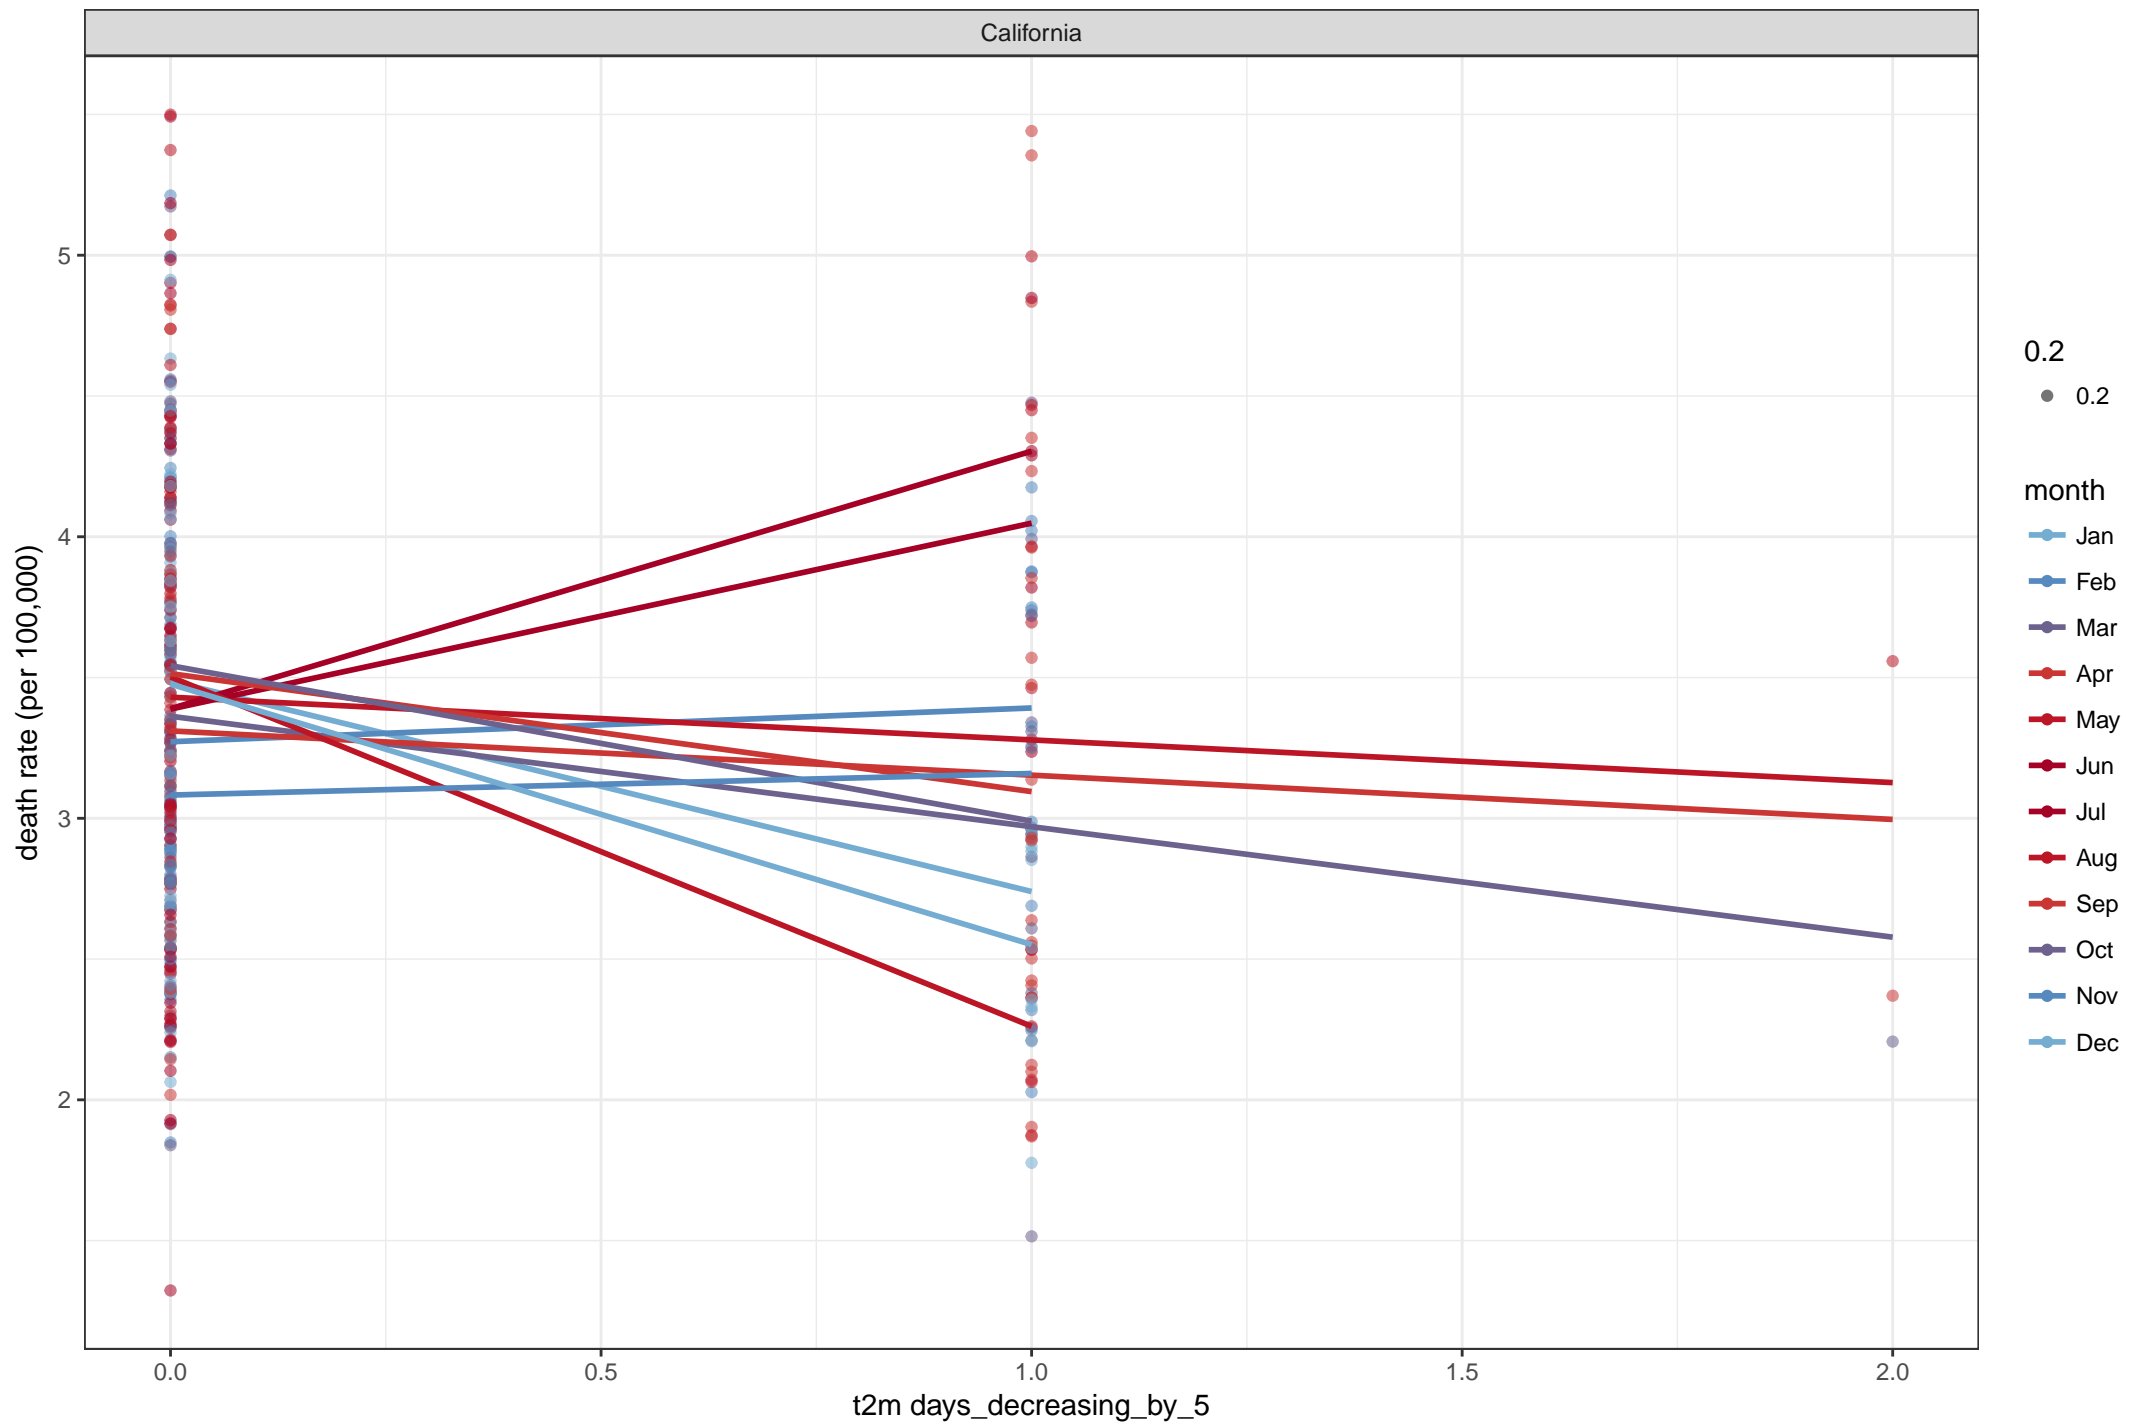

Death rates by state fitted by month 1982–2013 against t2m days\_decreasing\_by\_5 : female 15

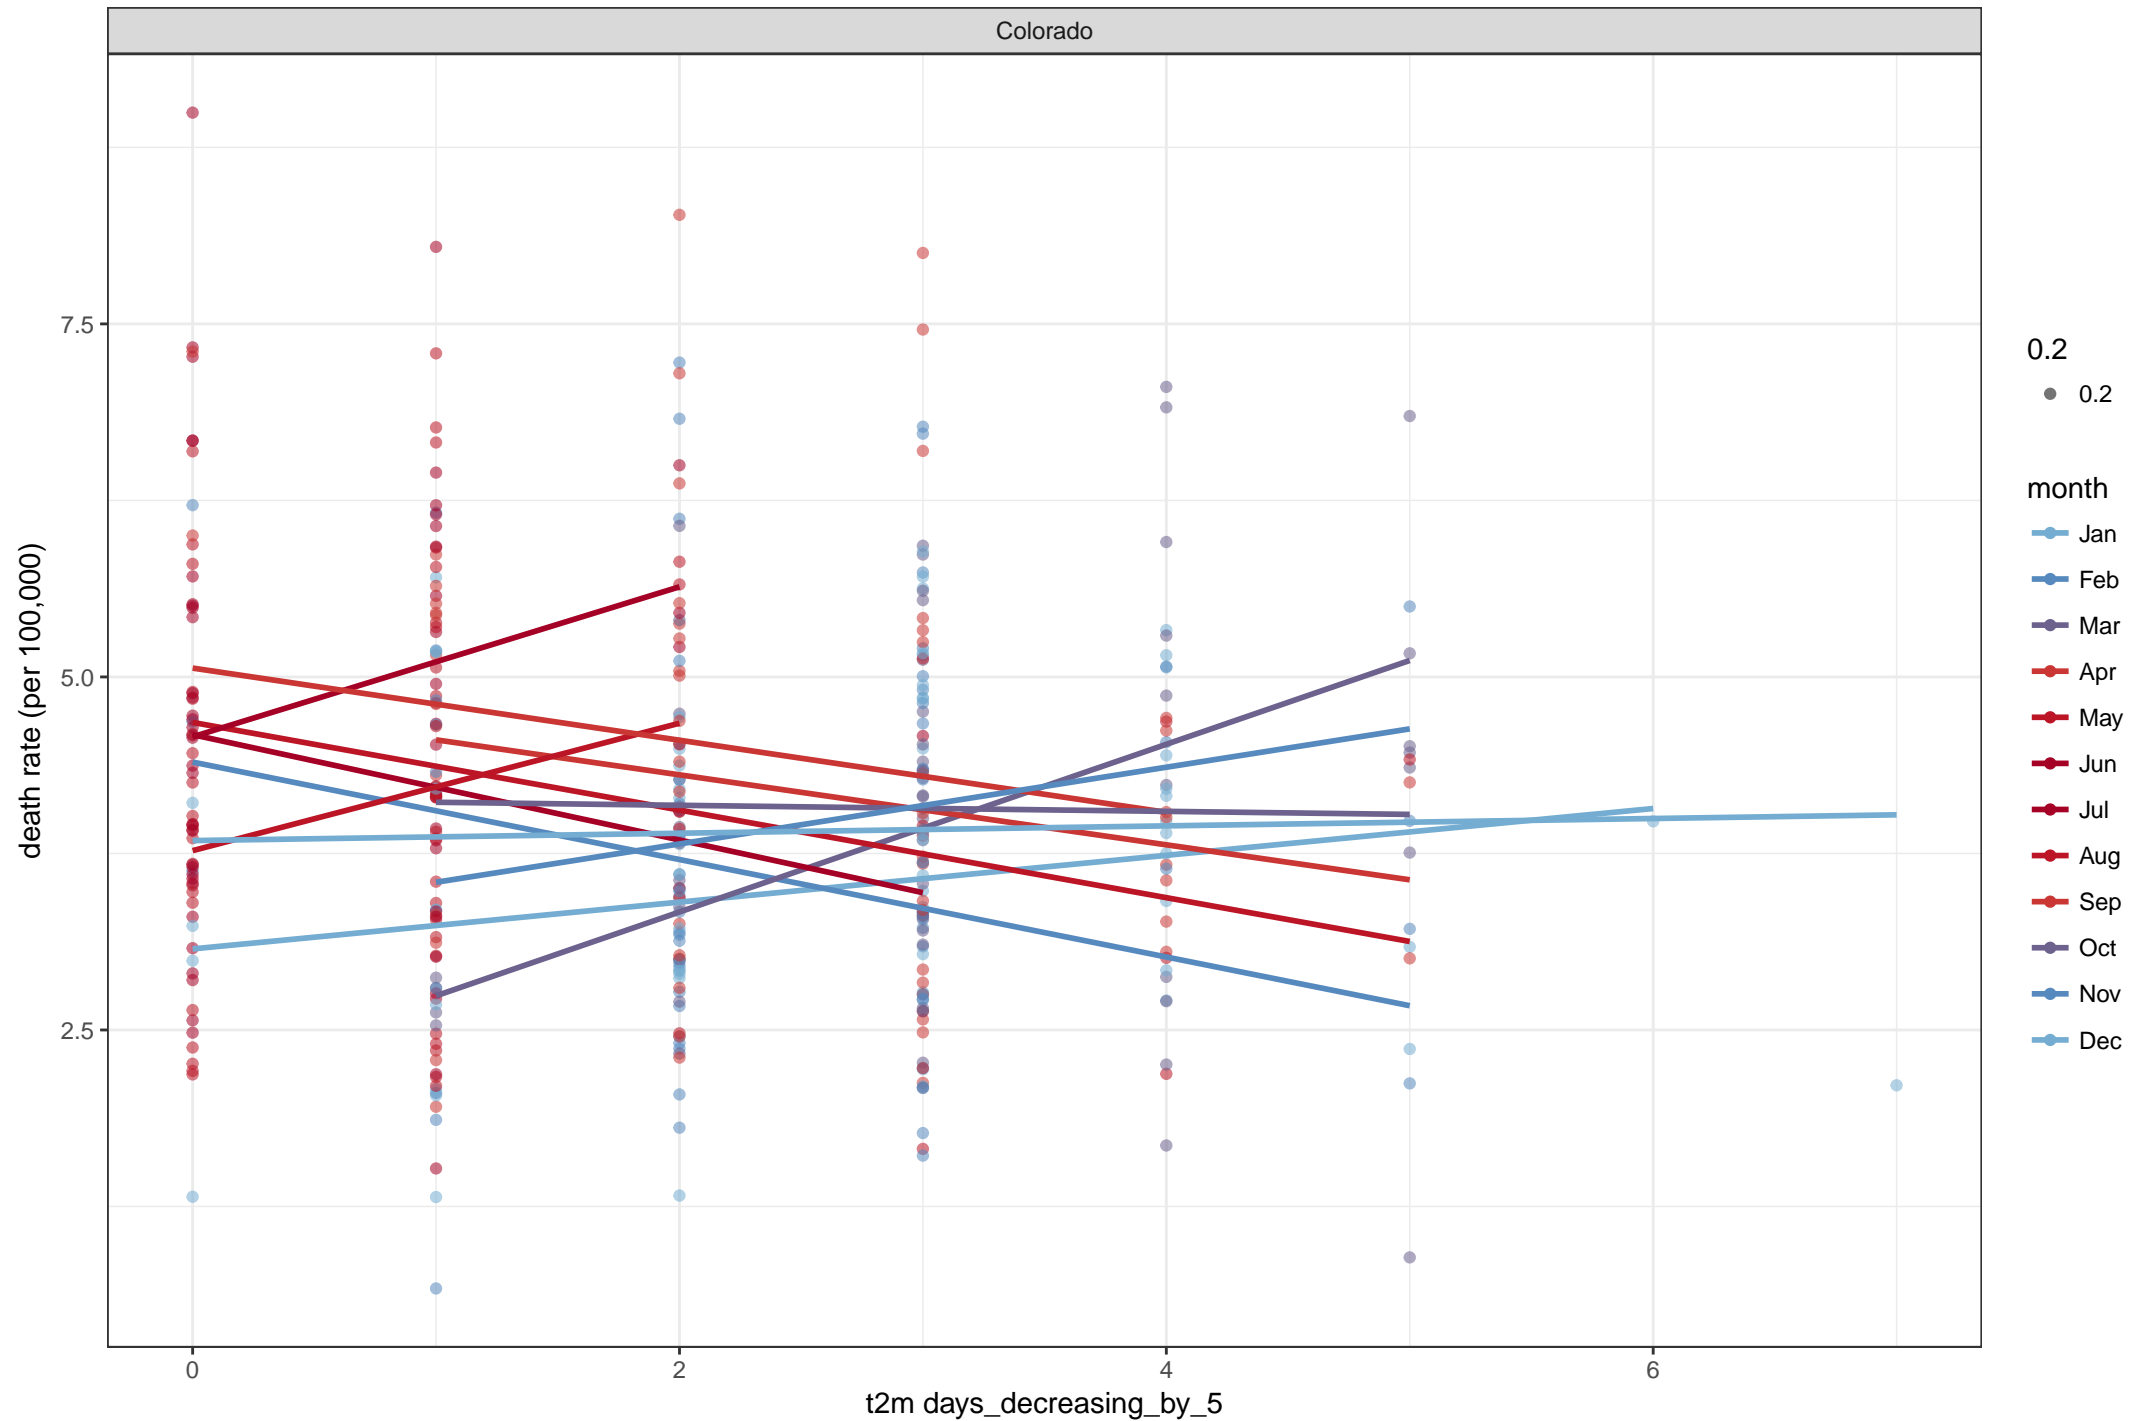

Death rates by state fitted by month 1982–2013 against t2m days\_decreasing\_by\_5 : female 15

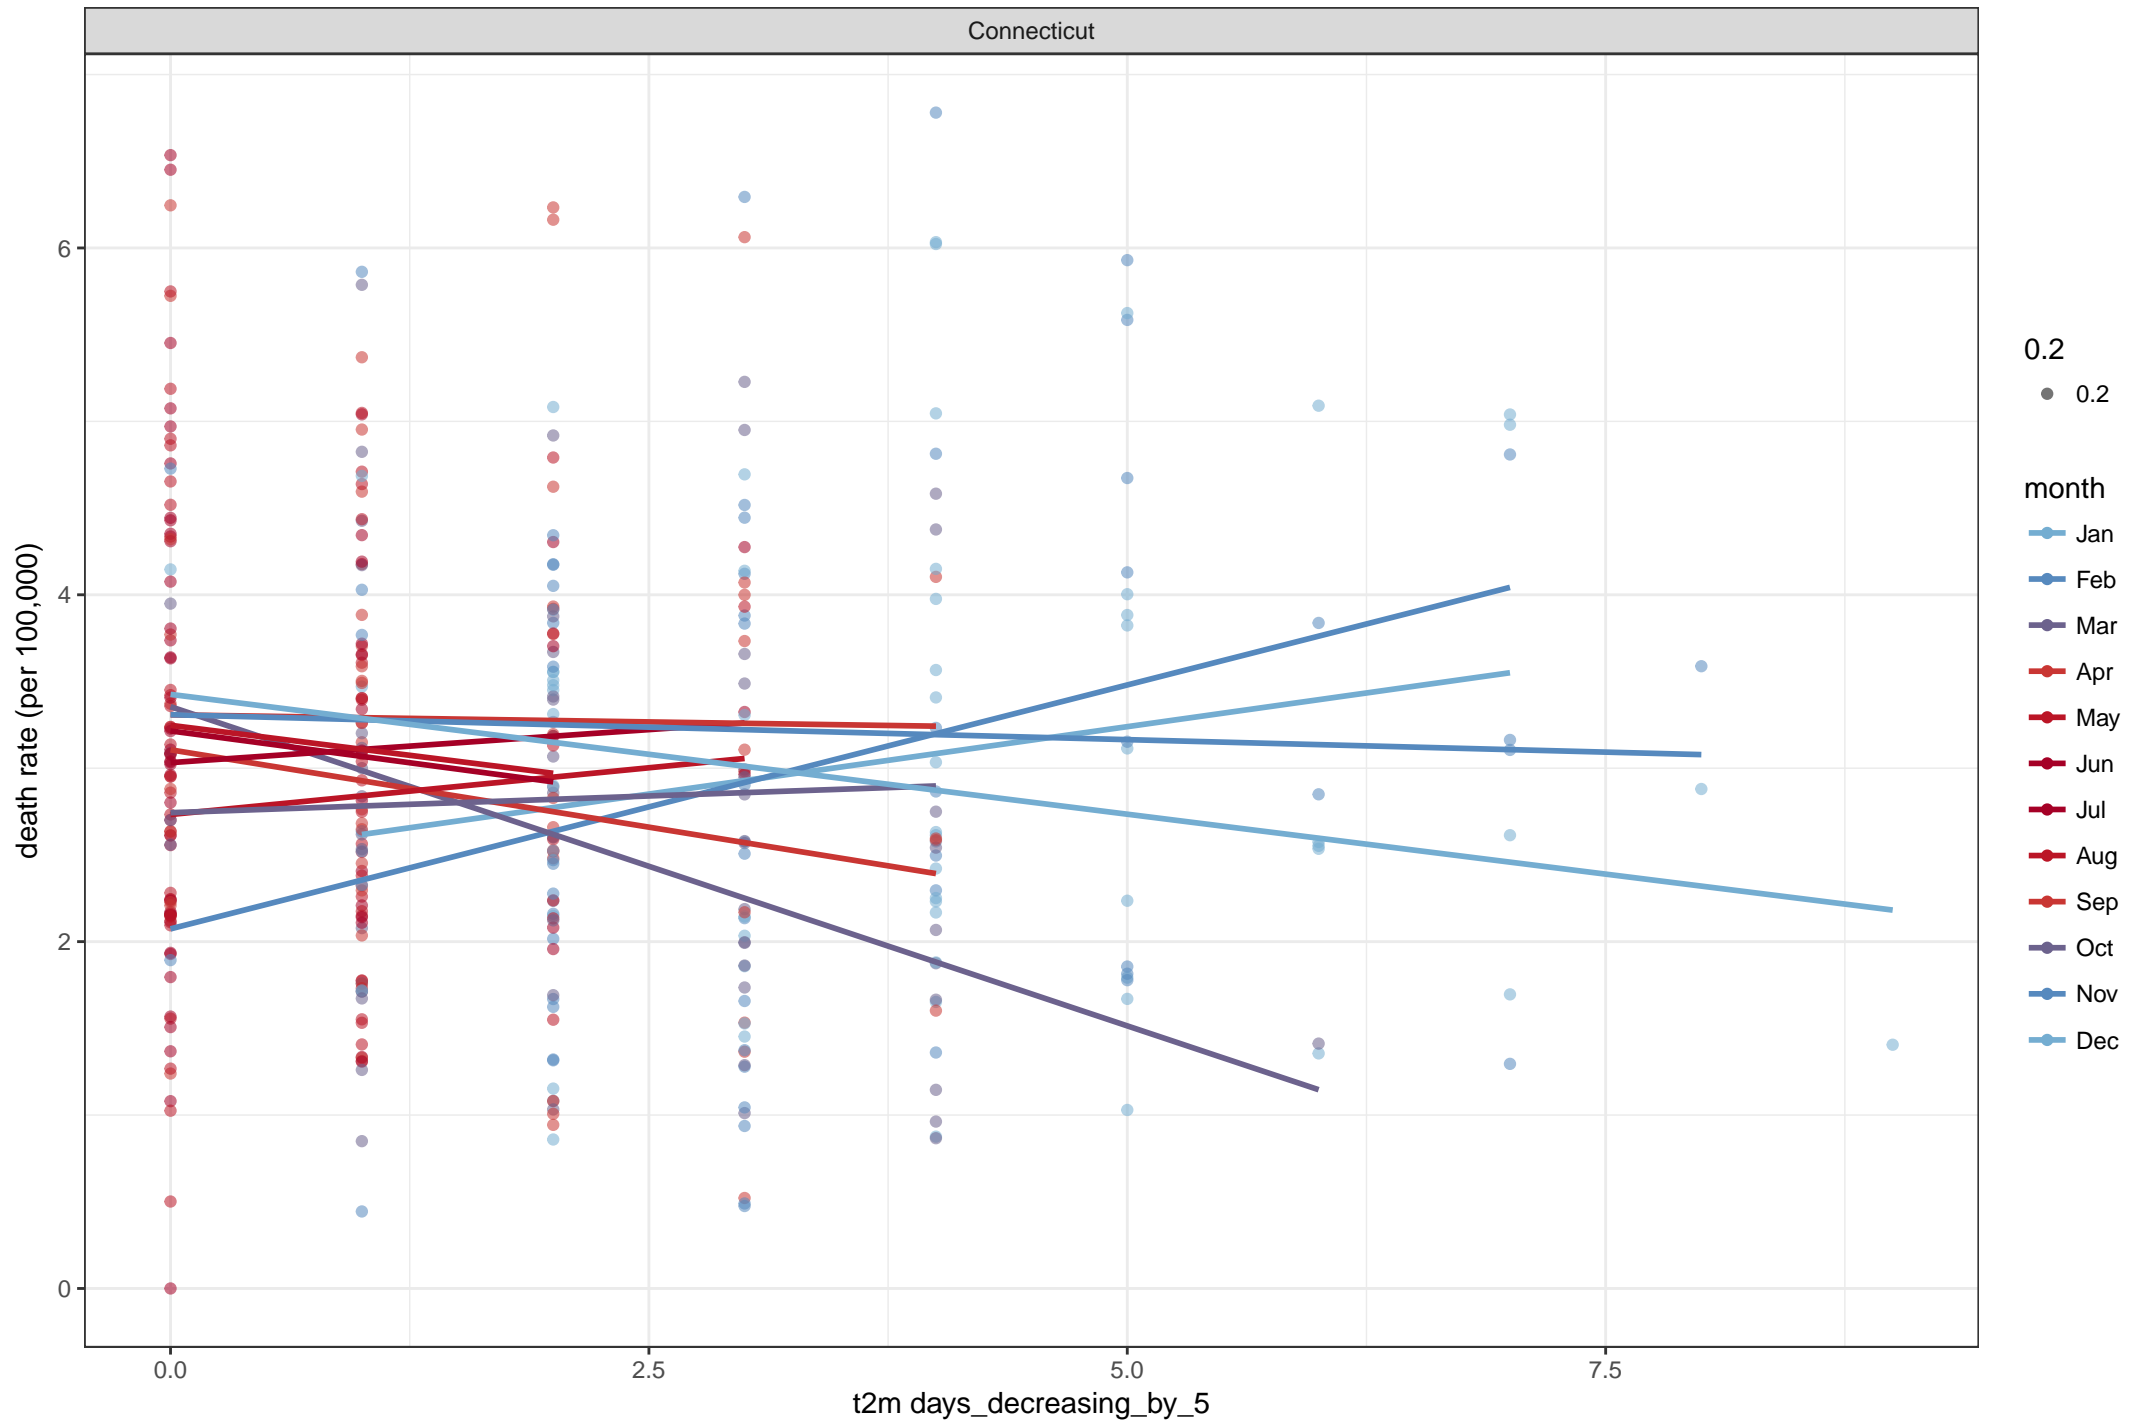

Death rates by state fitted by month 1982–2013 against t2m days\_decreasing\_by\_5 : female 15

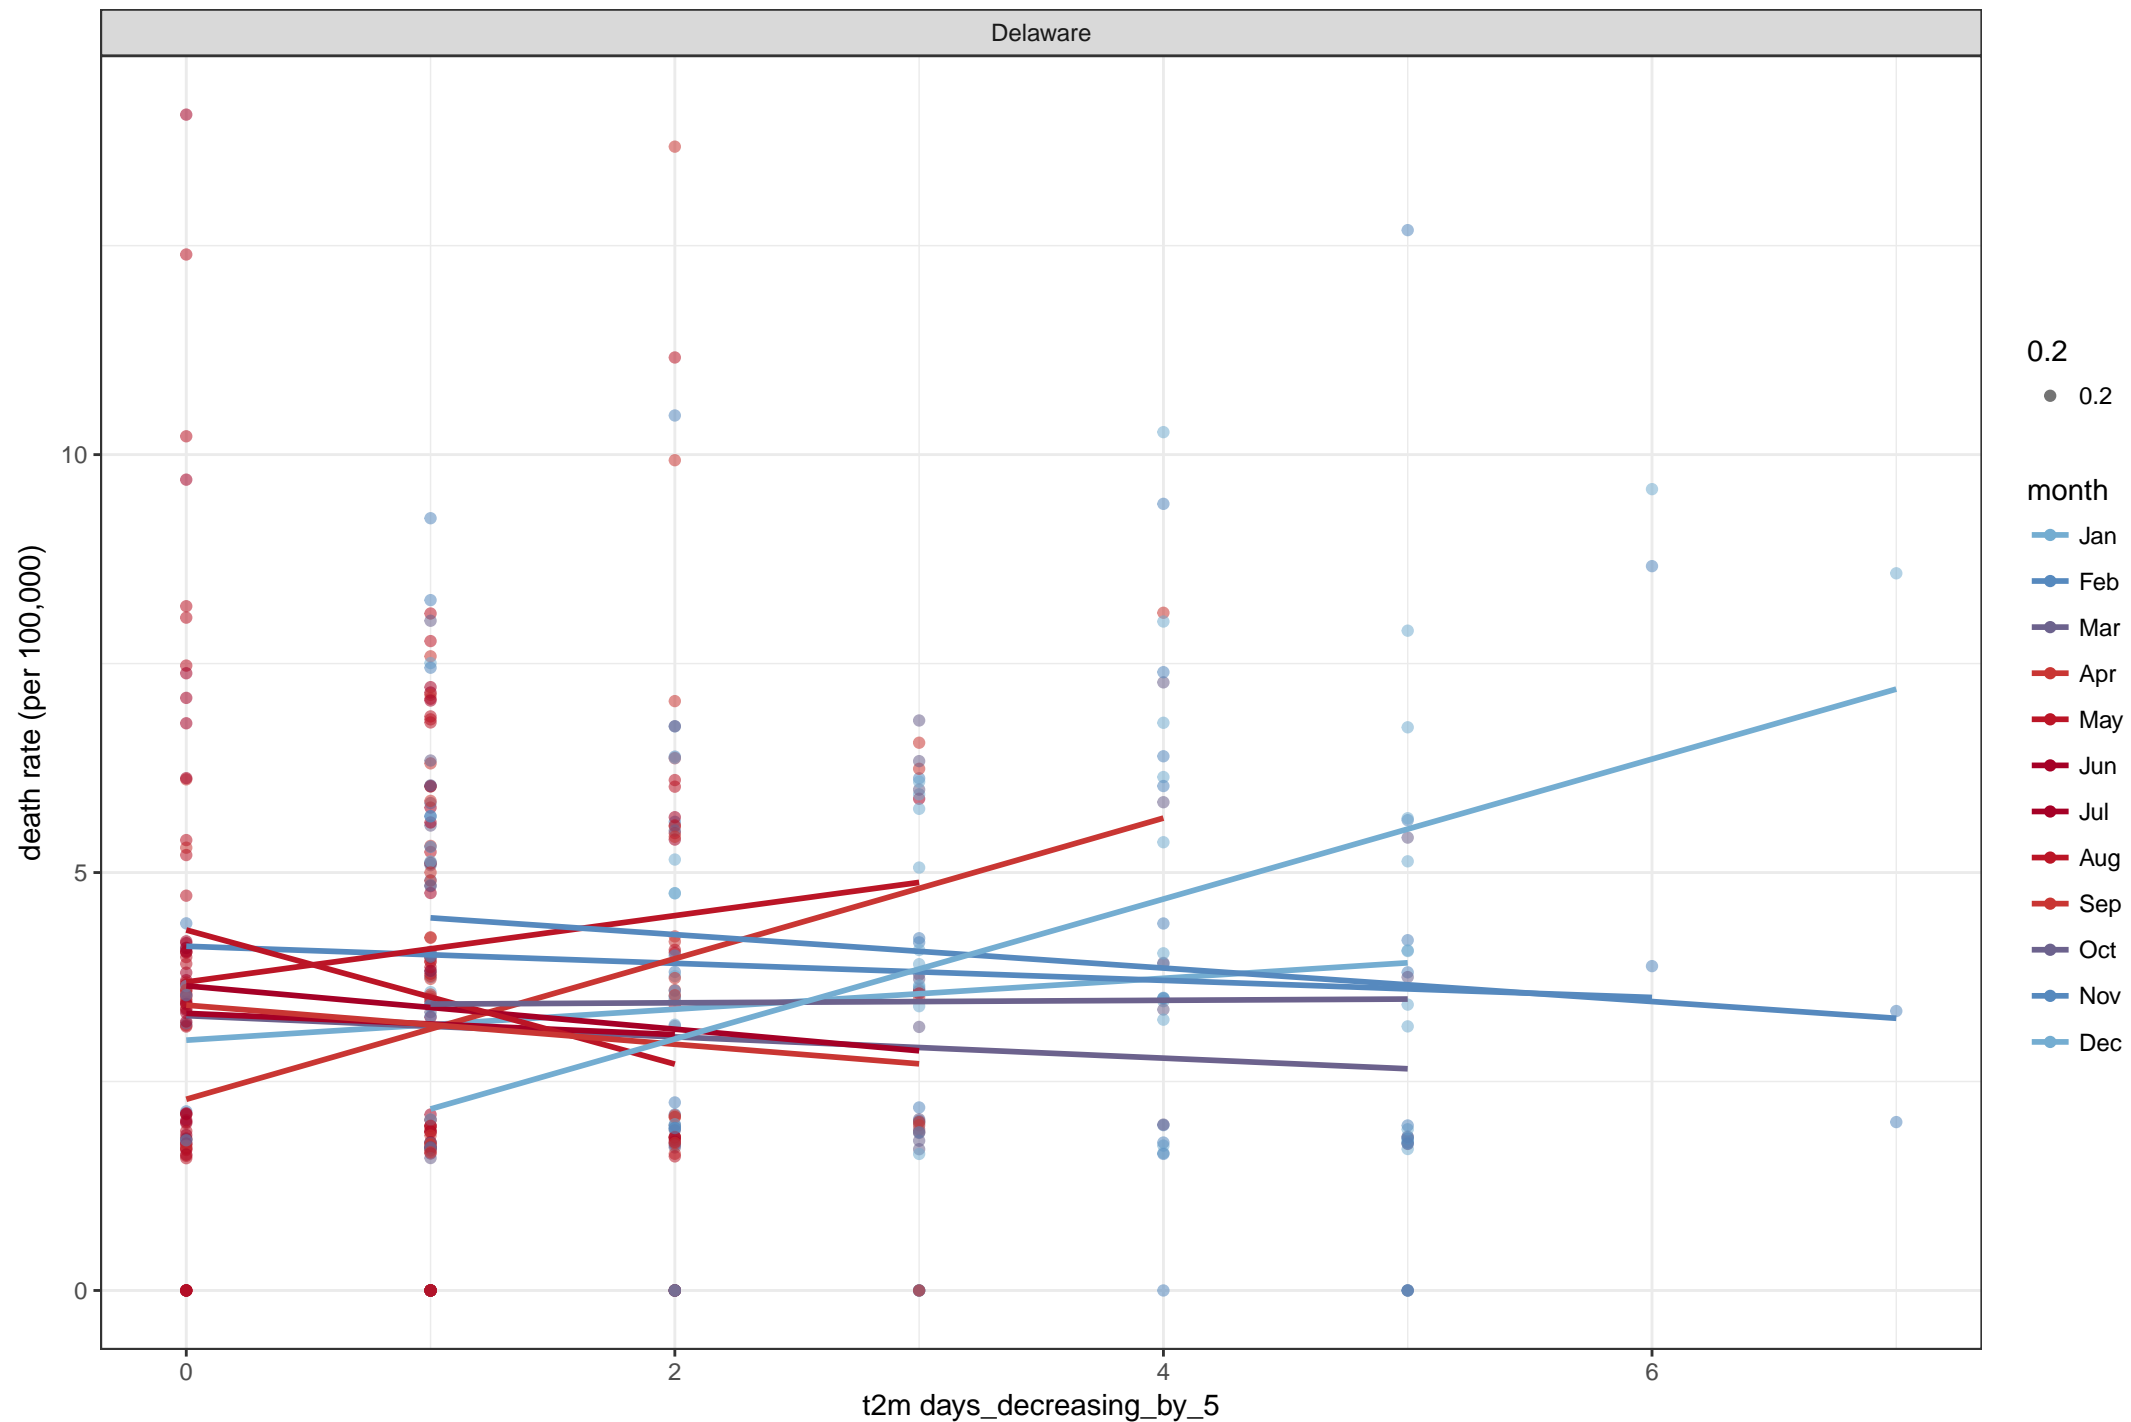

Death rates by state fitted by month 1982–2013 against t2m days\_decreasing\_by\_5 : female 15

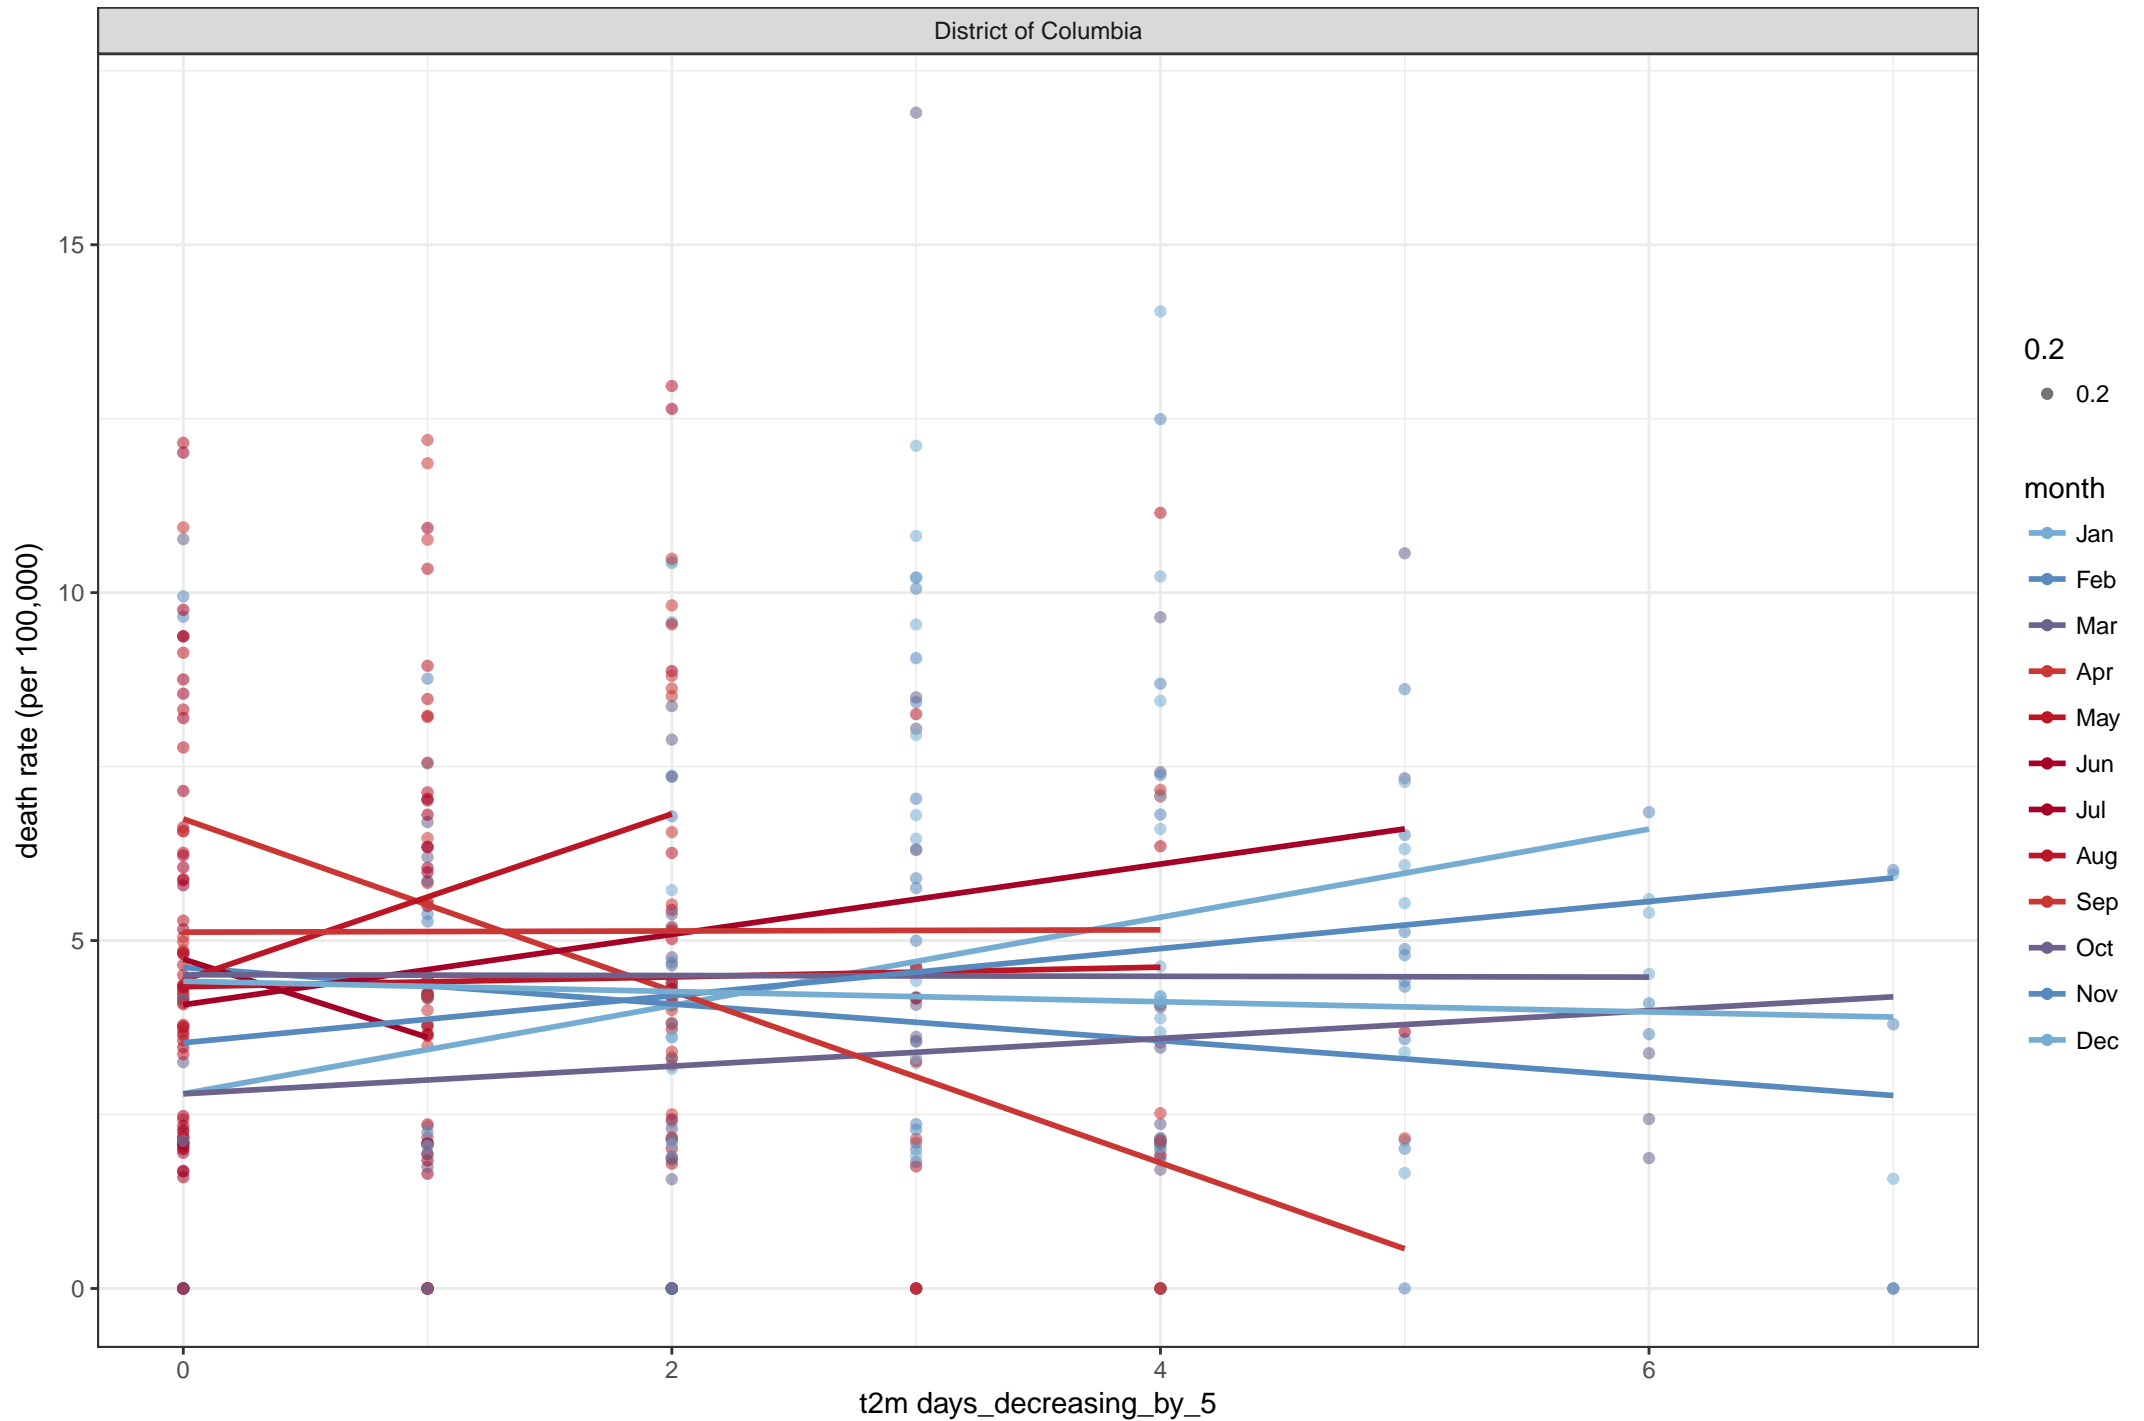

Death rates by state fitted by month 1982–2013 against t2m days\_decreasing\_by\_5 : female 15

Death rates by state fitted by month 1982–2013 against t2m days\_decreasing\_by\_5 : female 15

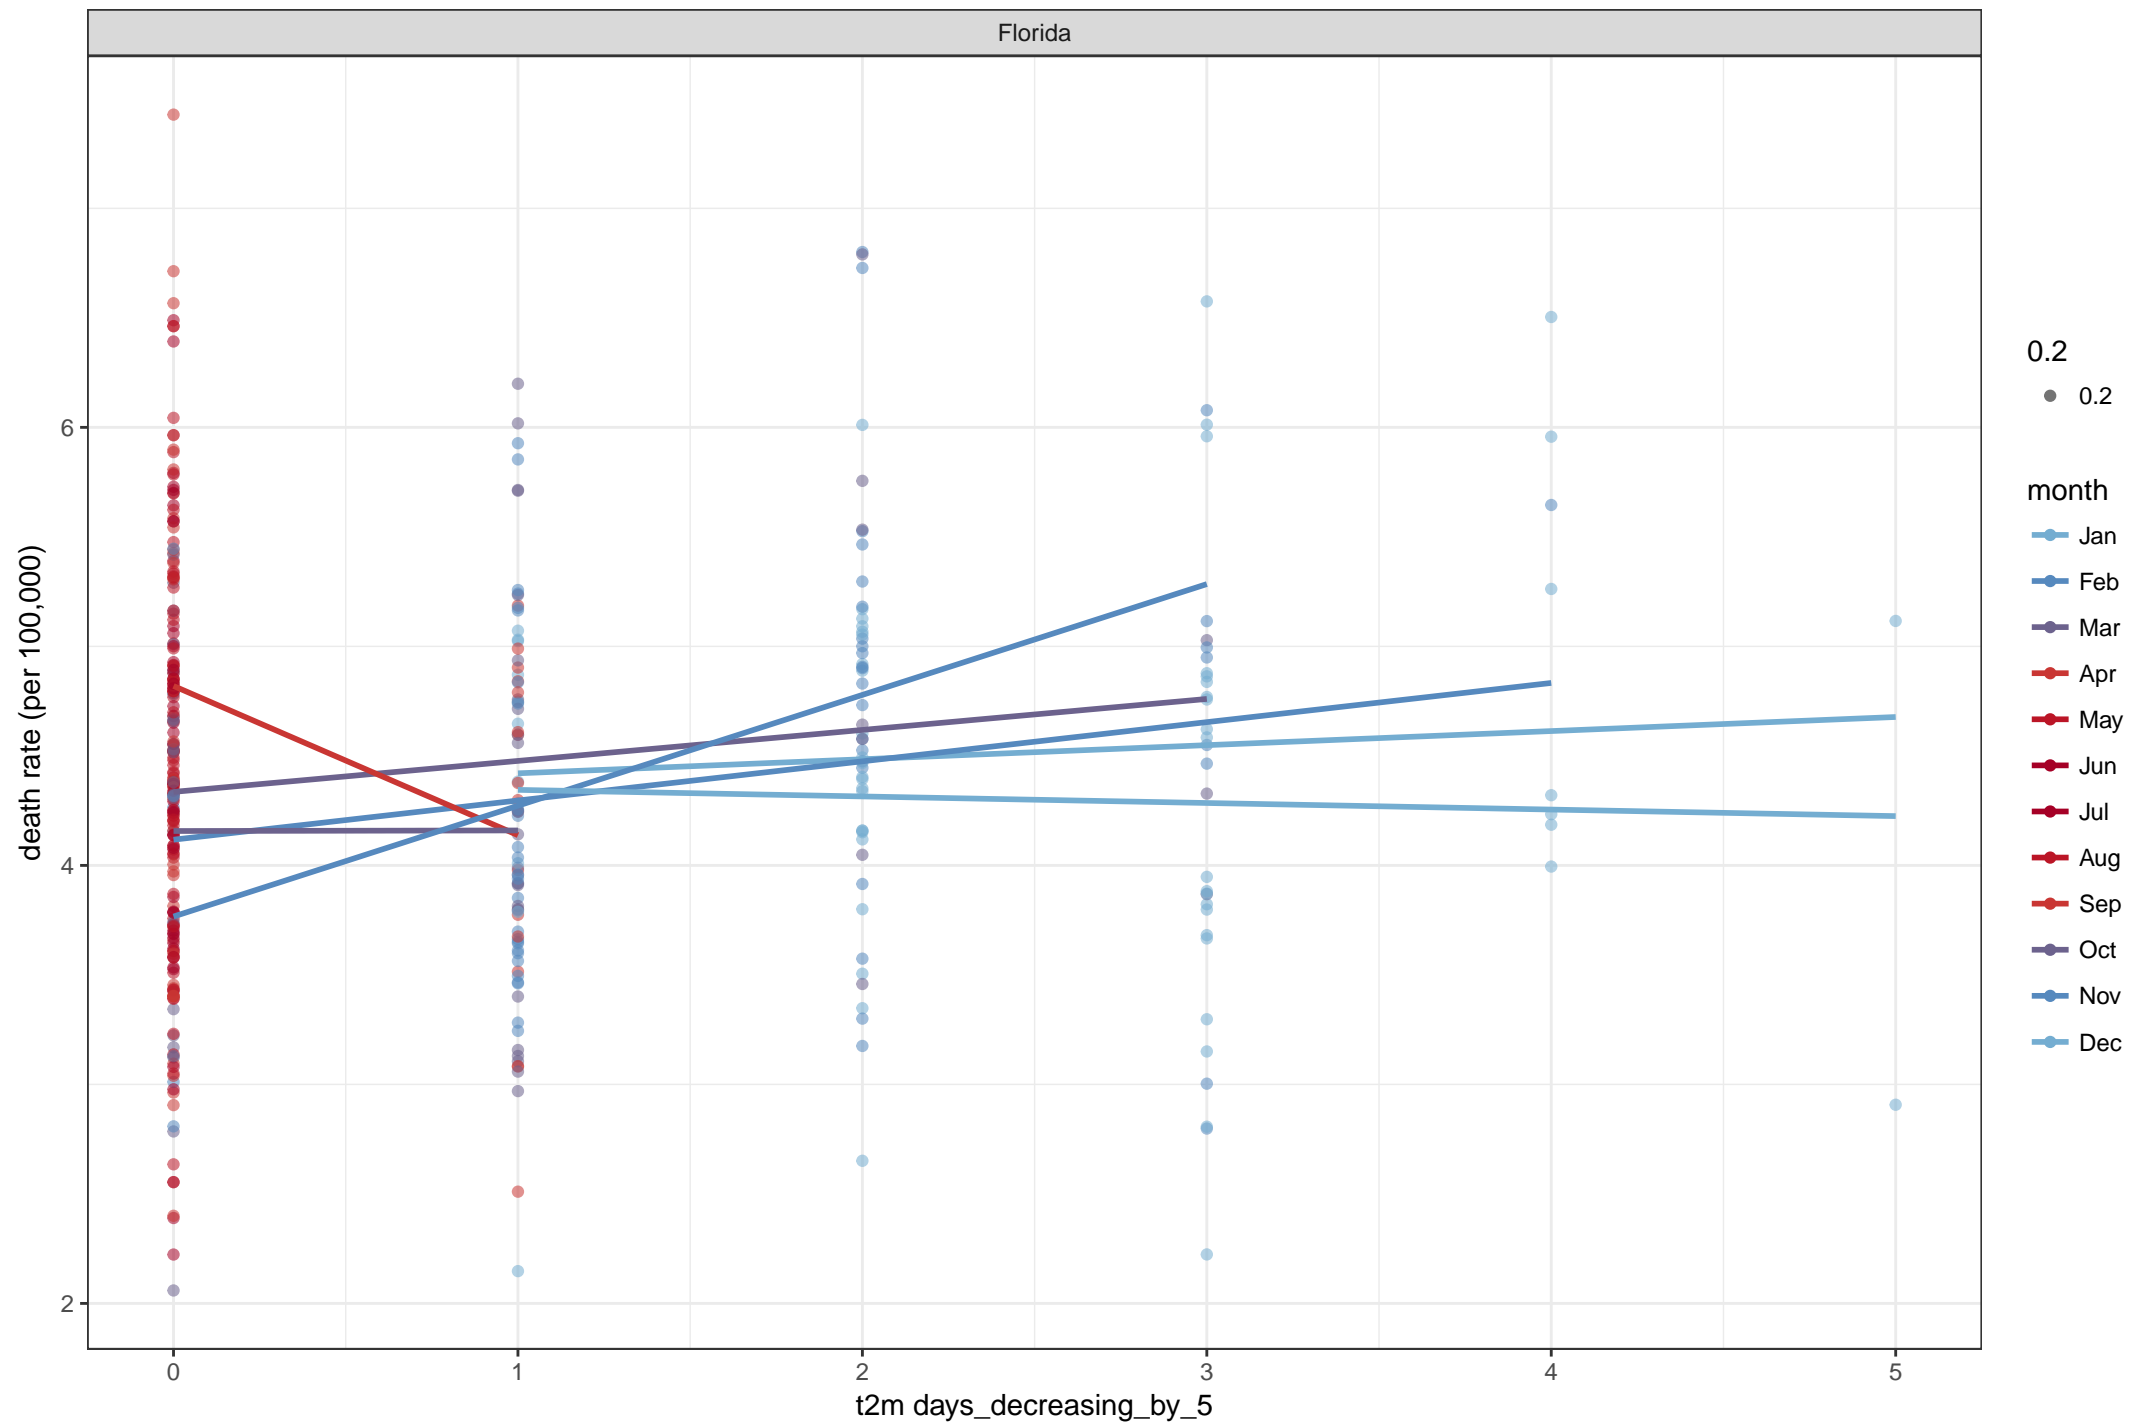

Death rates by state fitted by month 1982–2013 against t2m days\_decreasing\_by\_5 : female 15

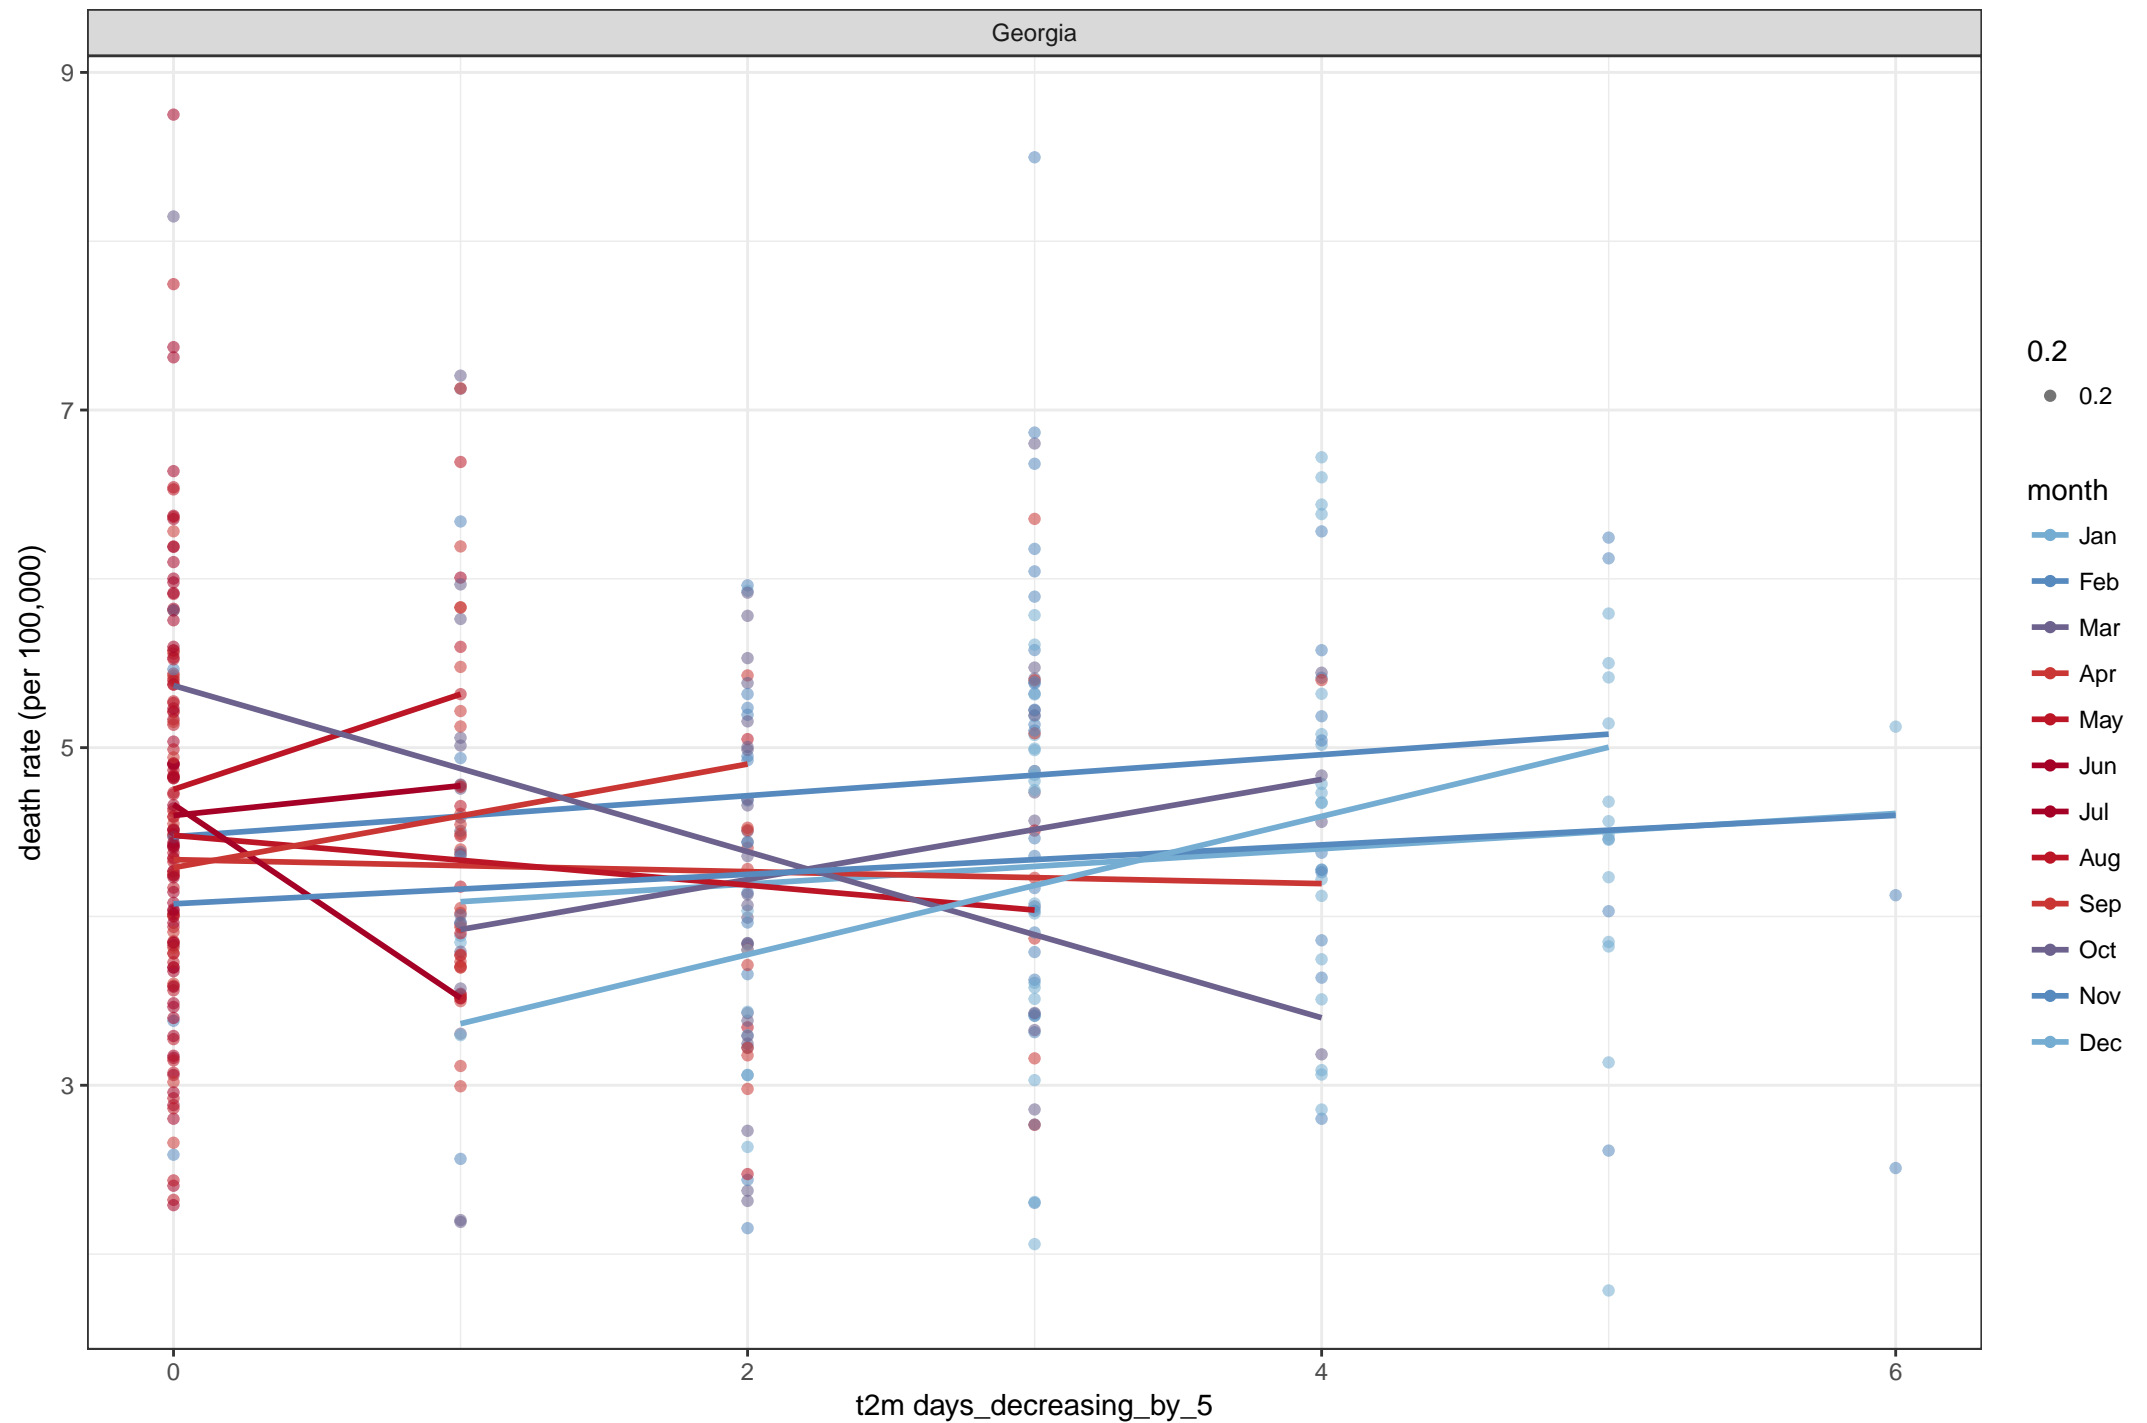

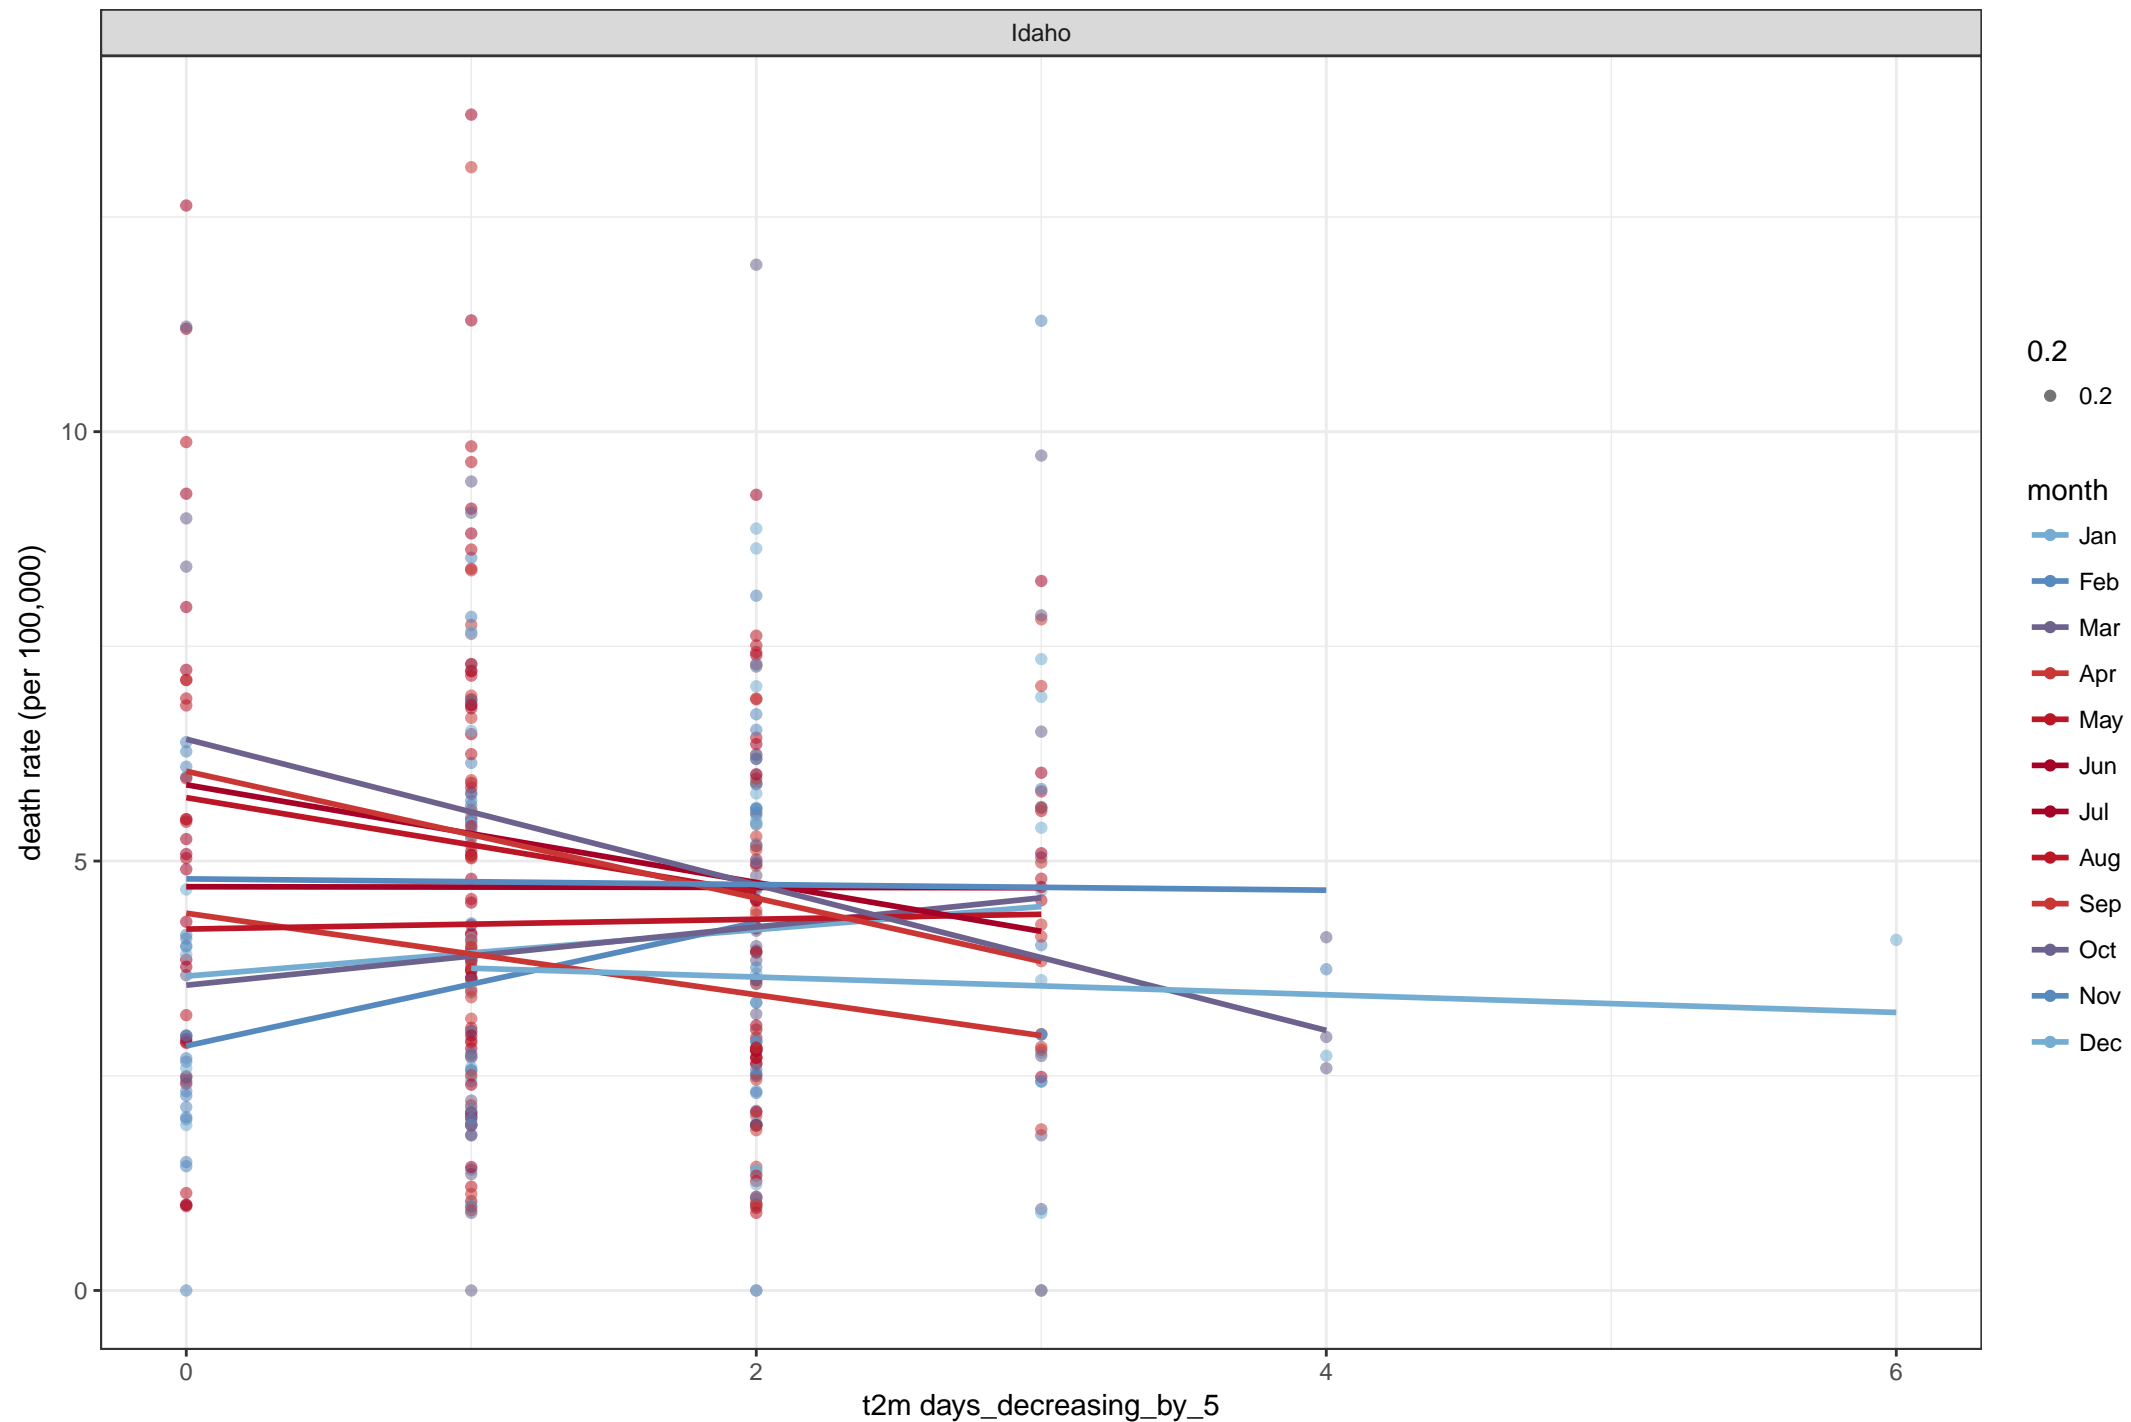

Death rates by state fitted by month 1982–2013 against t2m days\_decreasing\_by\_5 : female 15

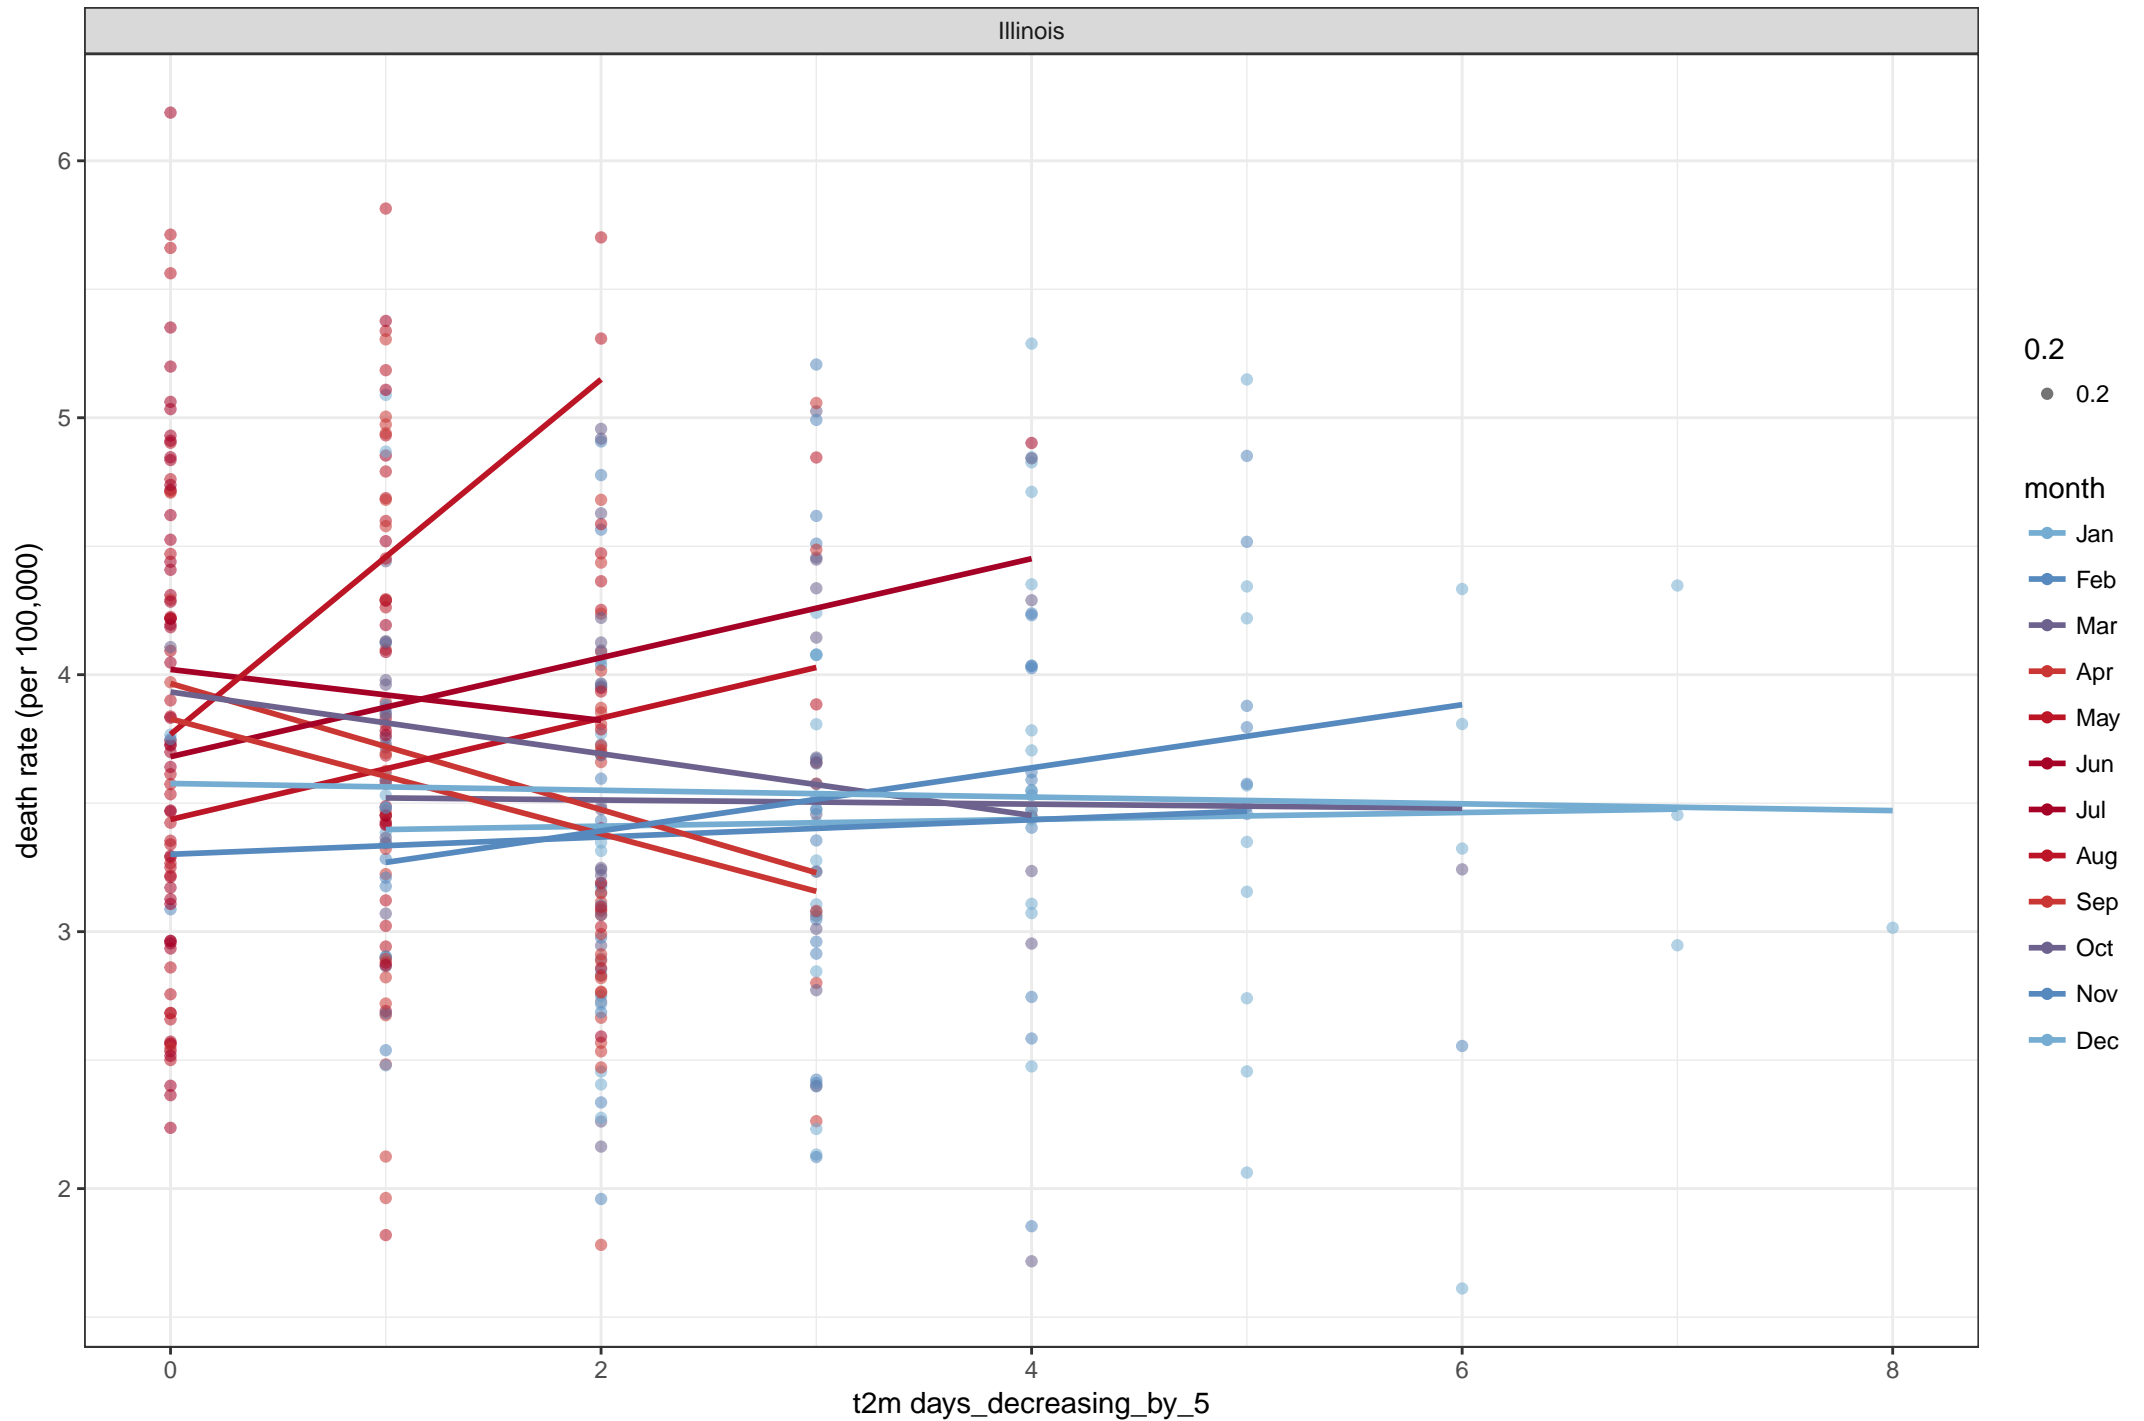

Death rates by state fitted by month 1982–2013 against t2m days\_decreasing\_by\_5 : female 15

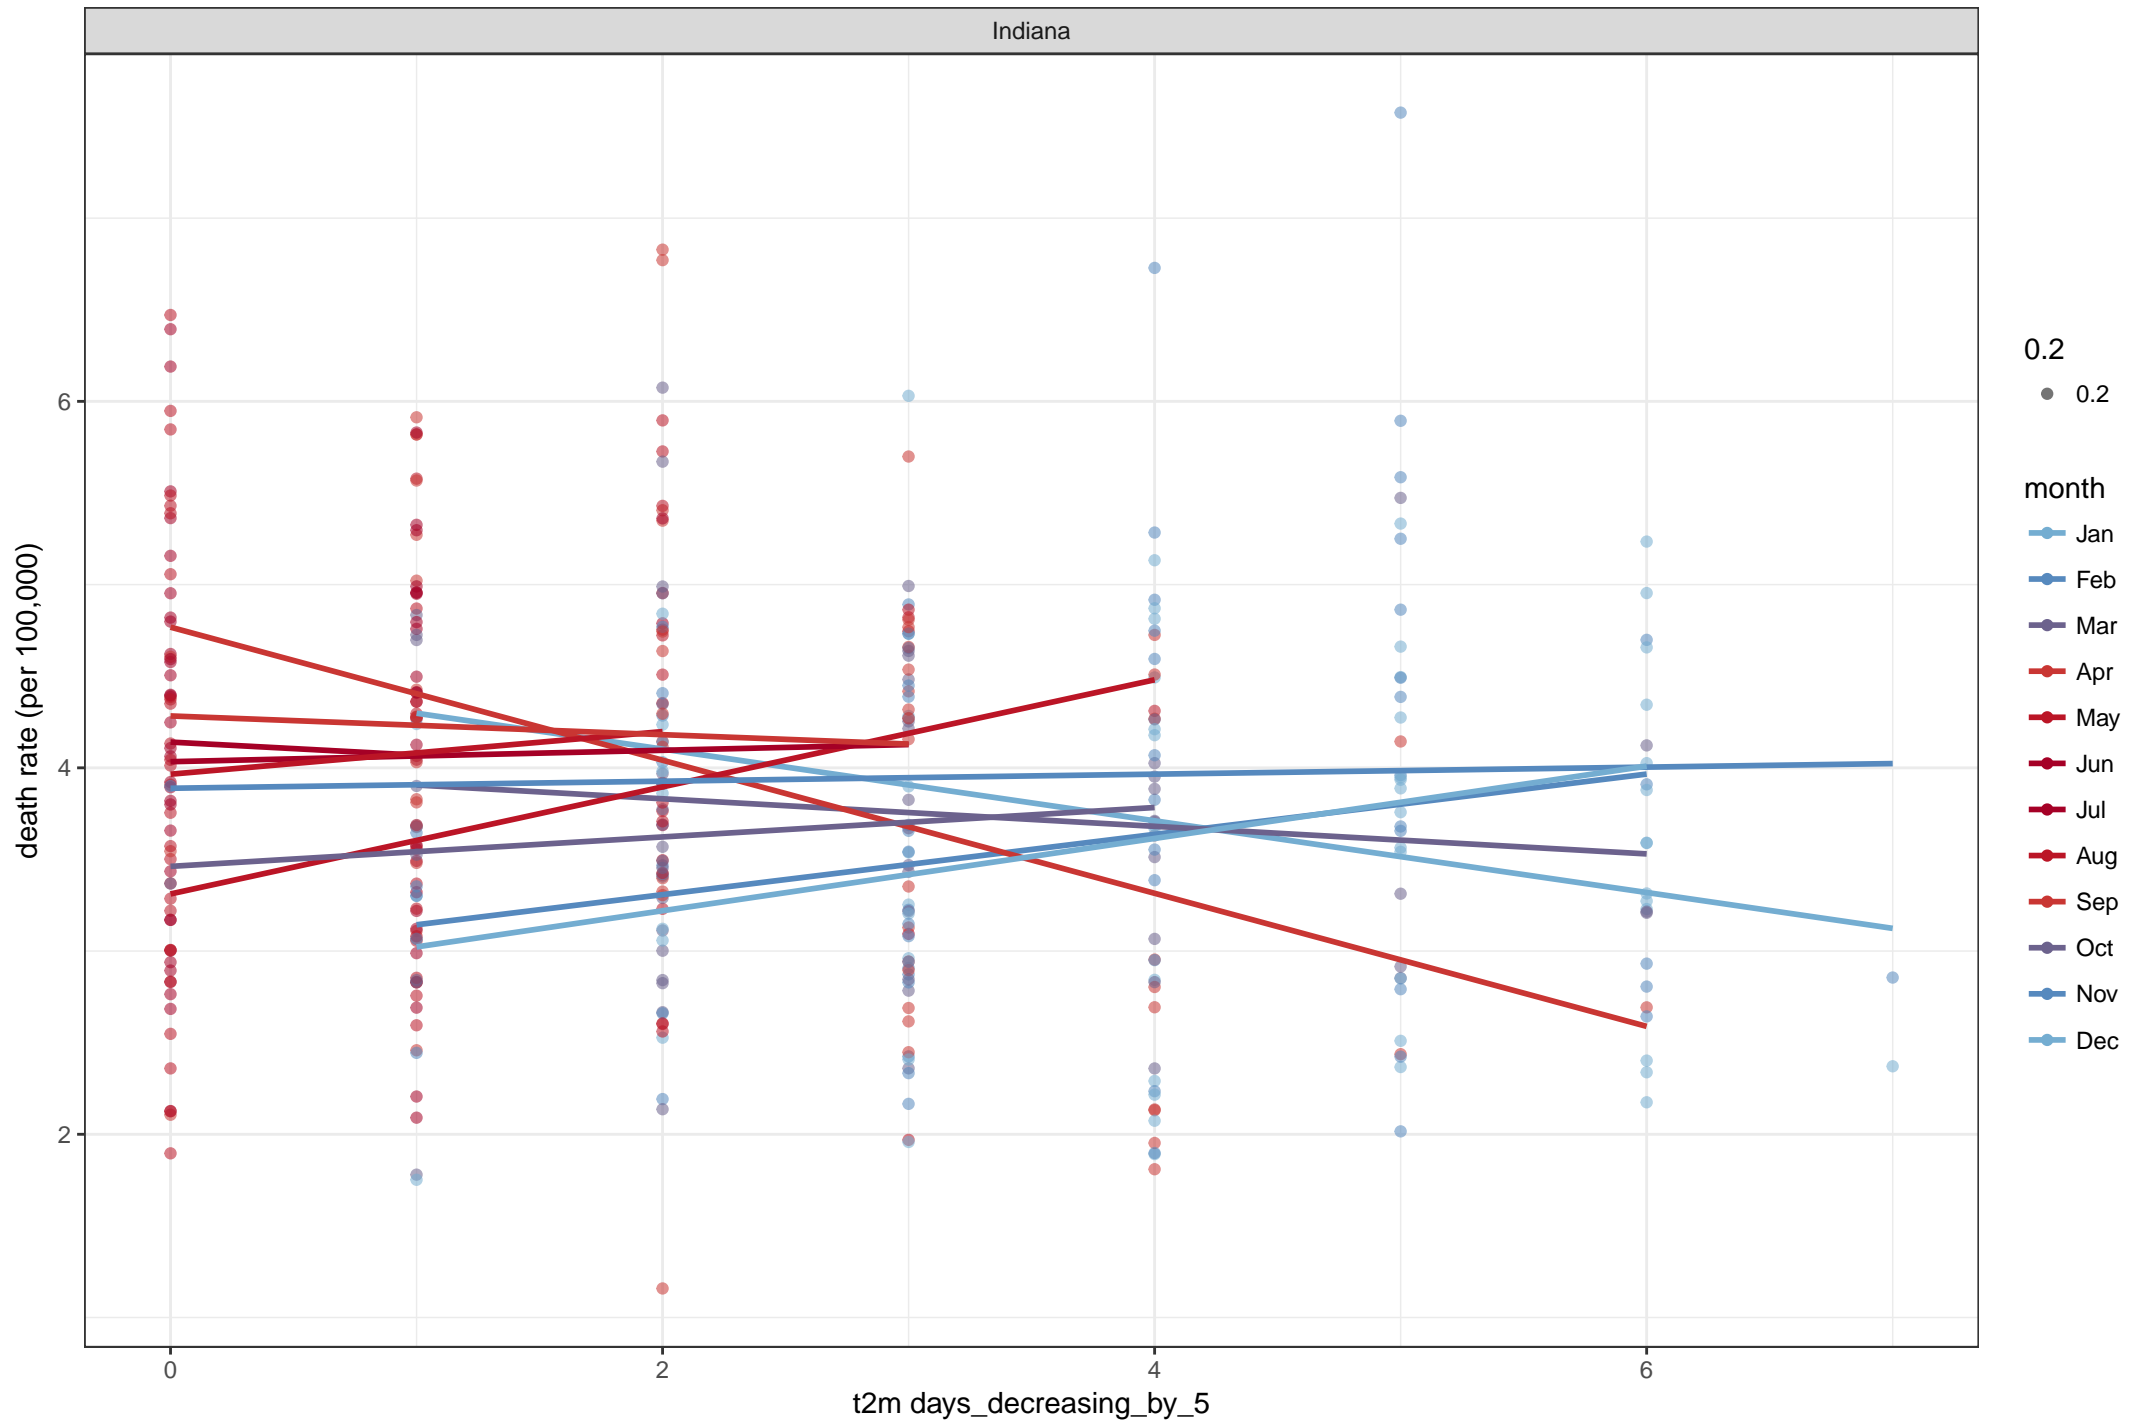

Death rates by state fitted by month 1982–2013 against t2m days\_decreasing\_by\_5 : female 15

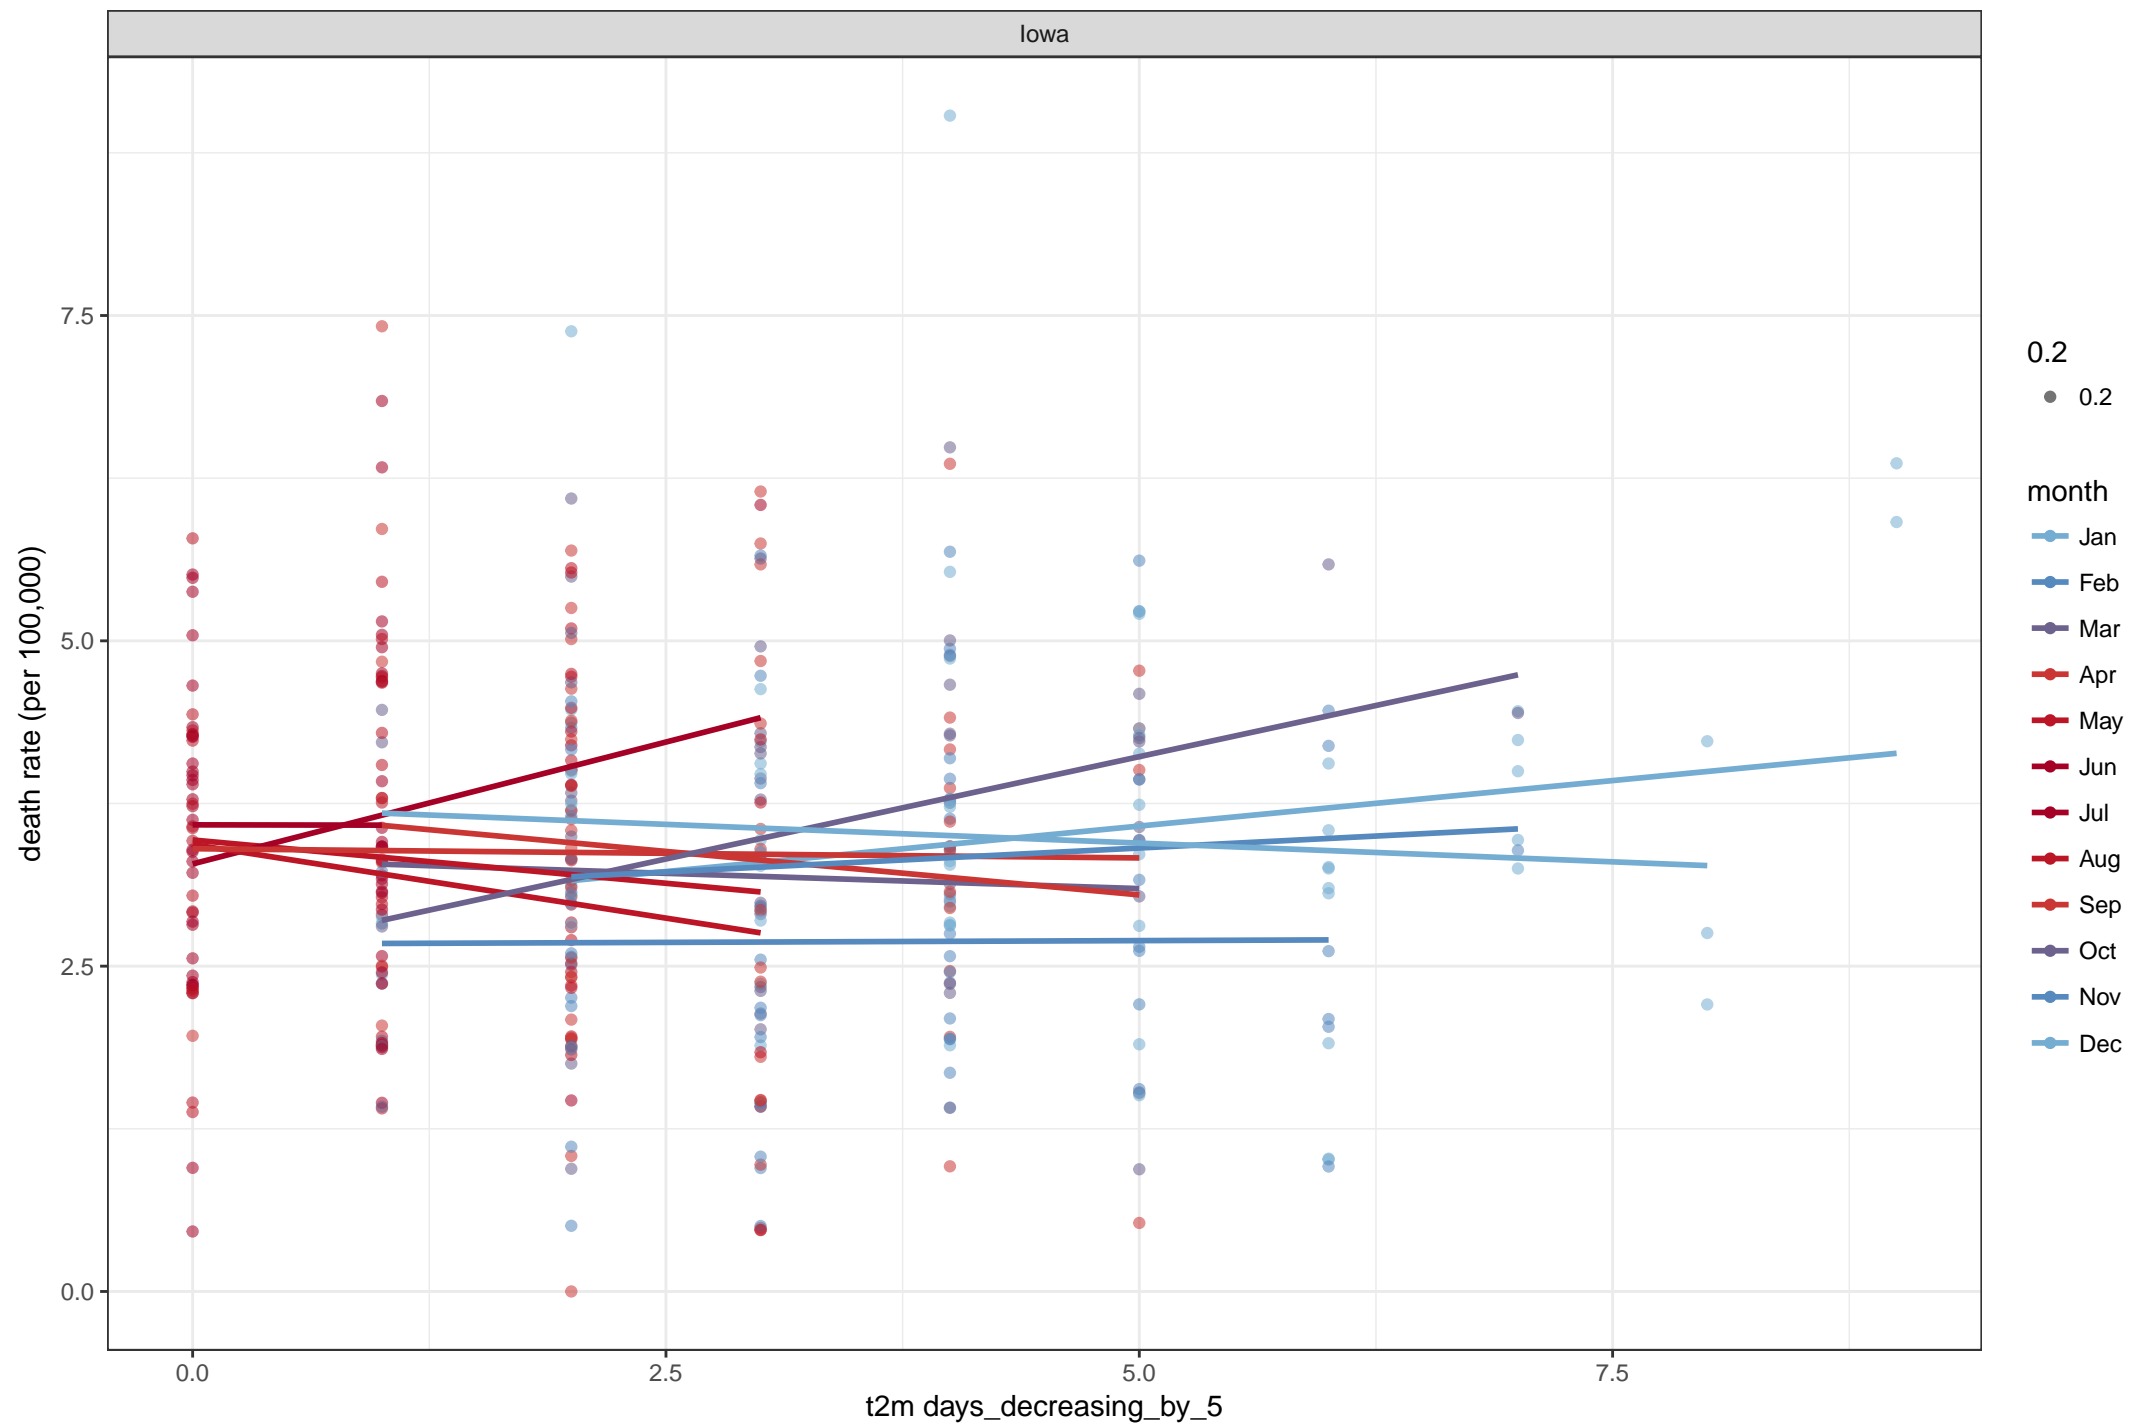

Death rates by state fitted by month 1982–2013 against t2m days\_decreasing\_by\_5 : female 15

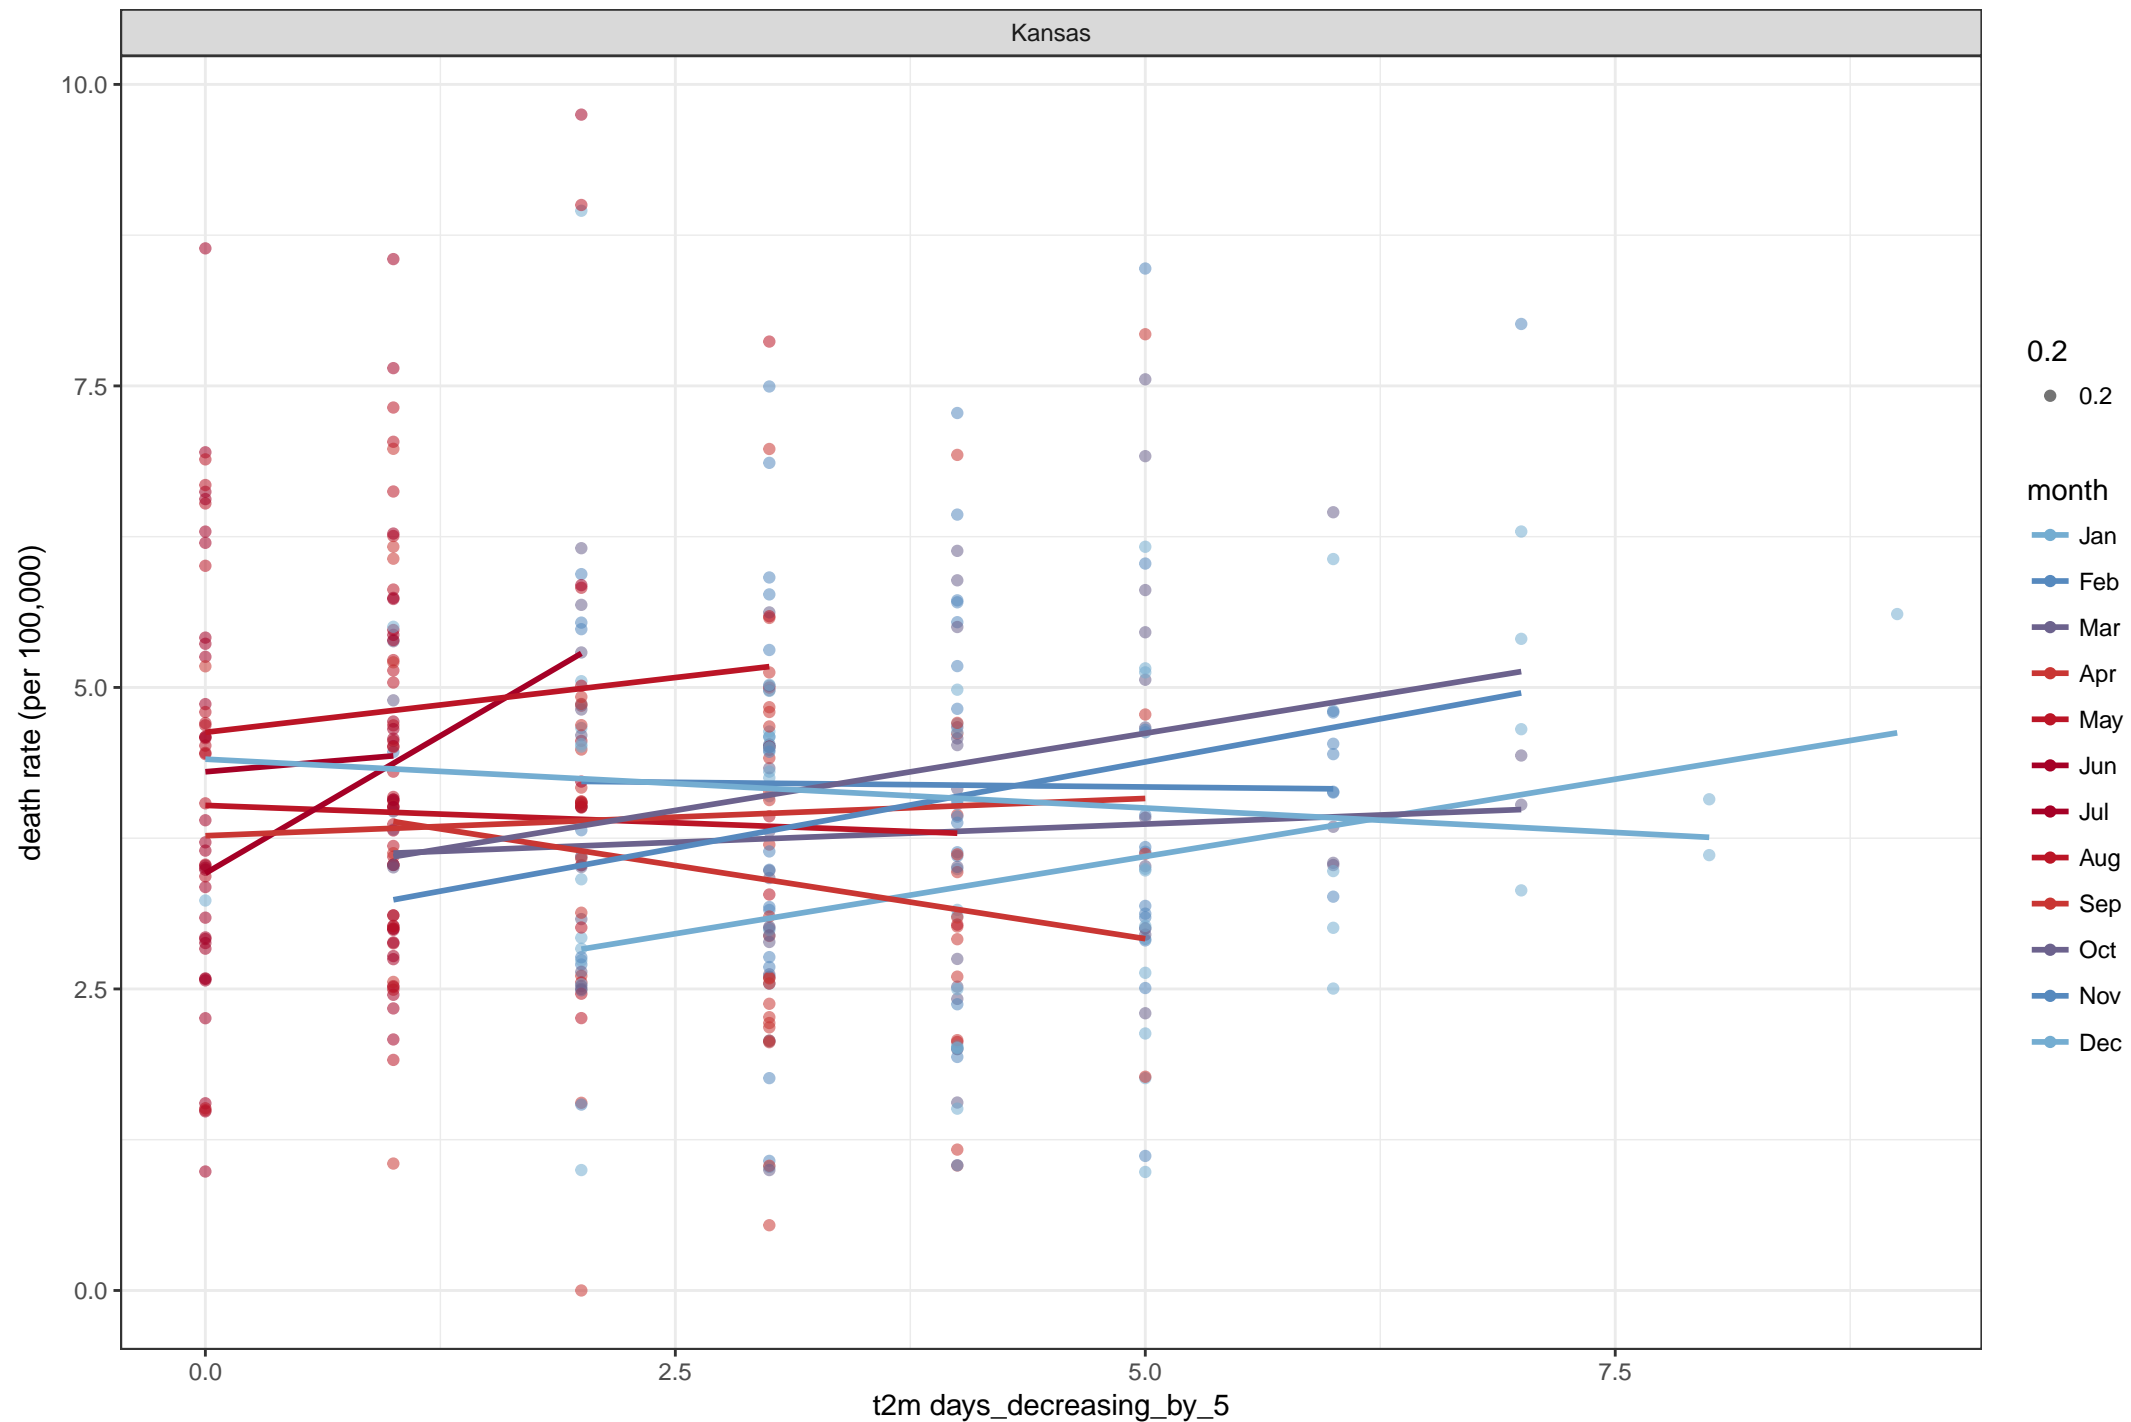

Death rates by state fitted by month 1982–2013 against t2m days\_decreasing\_by\_5 : female 15

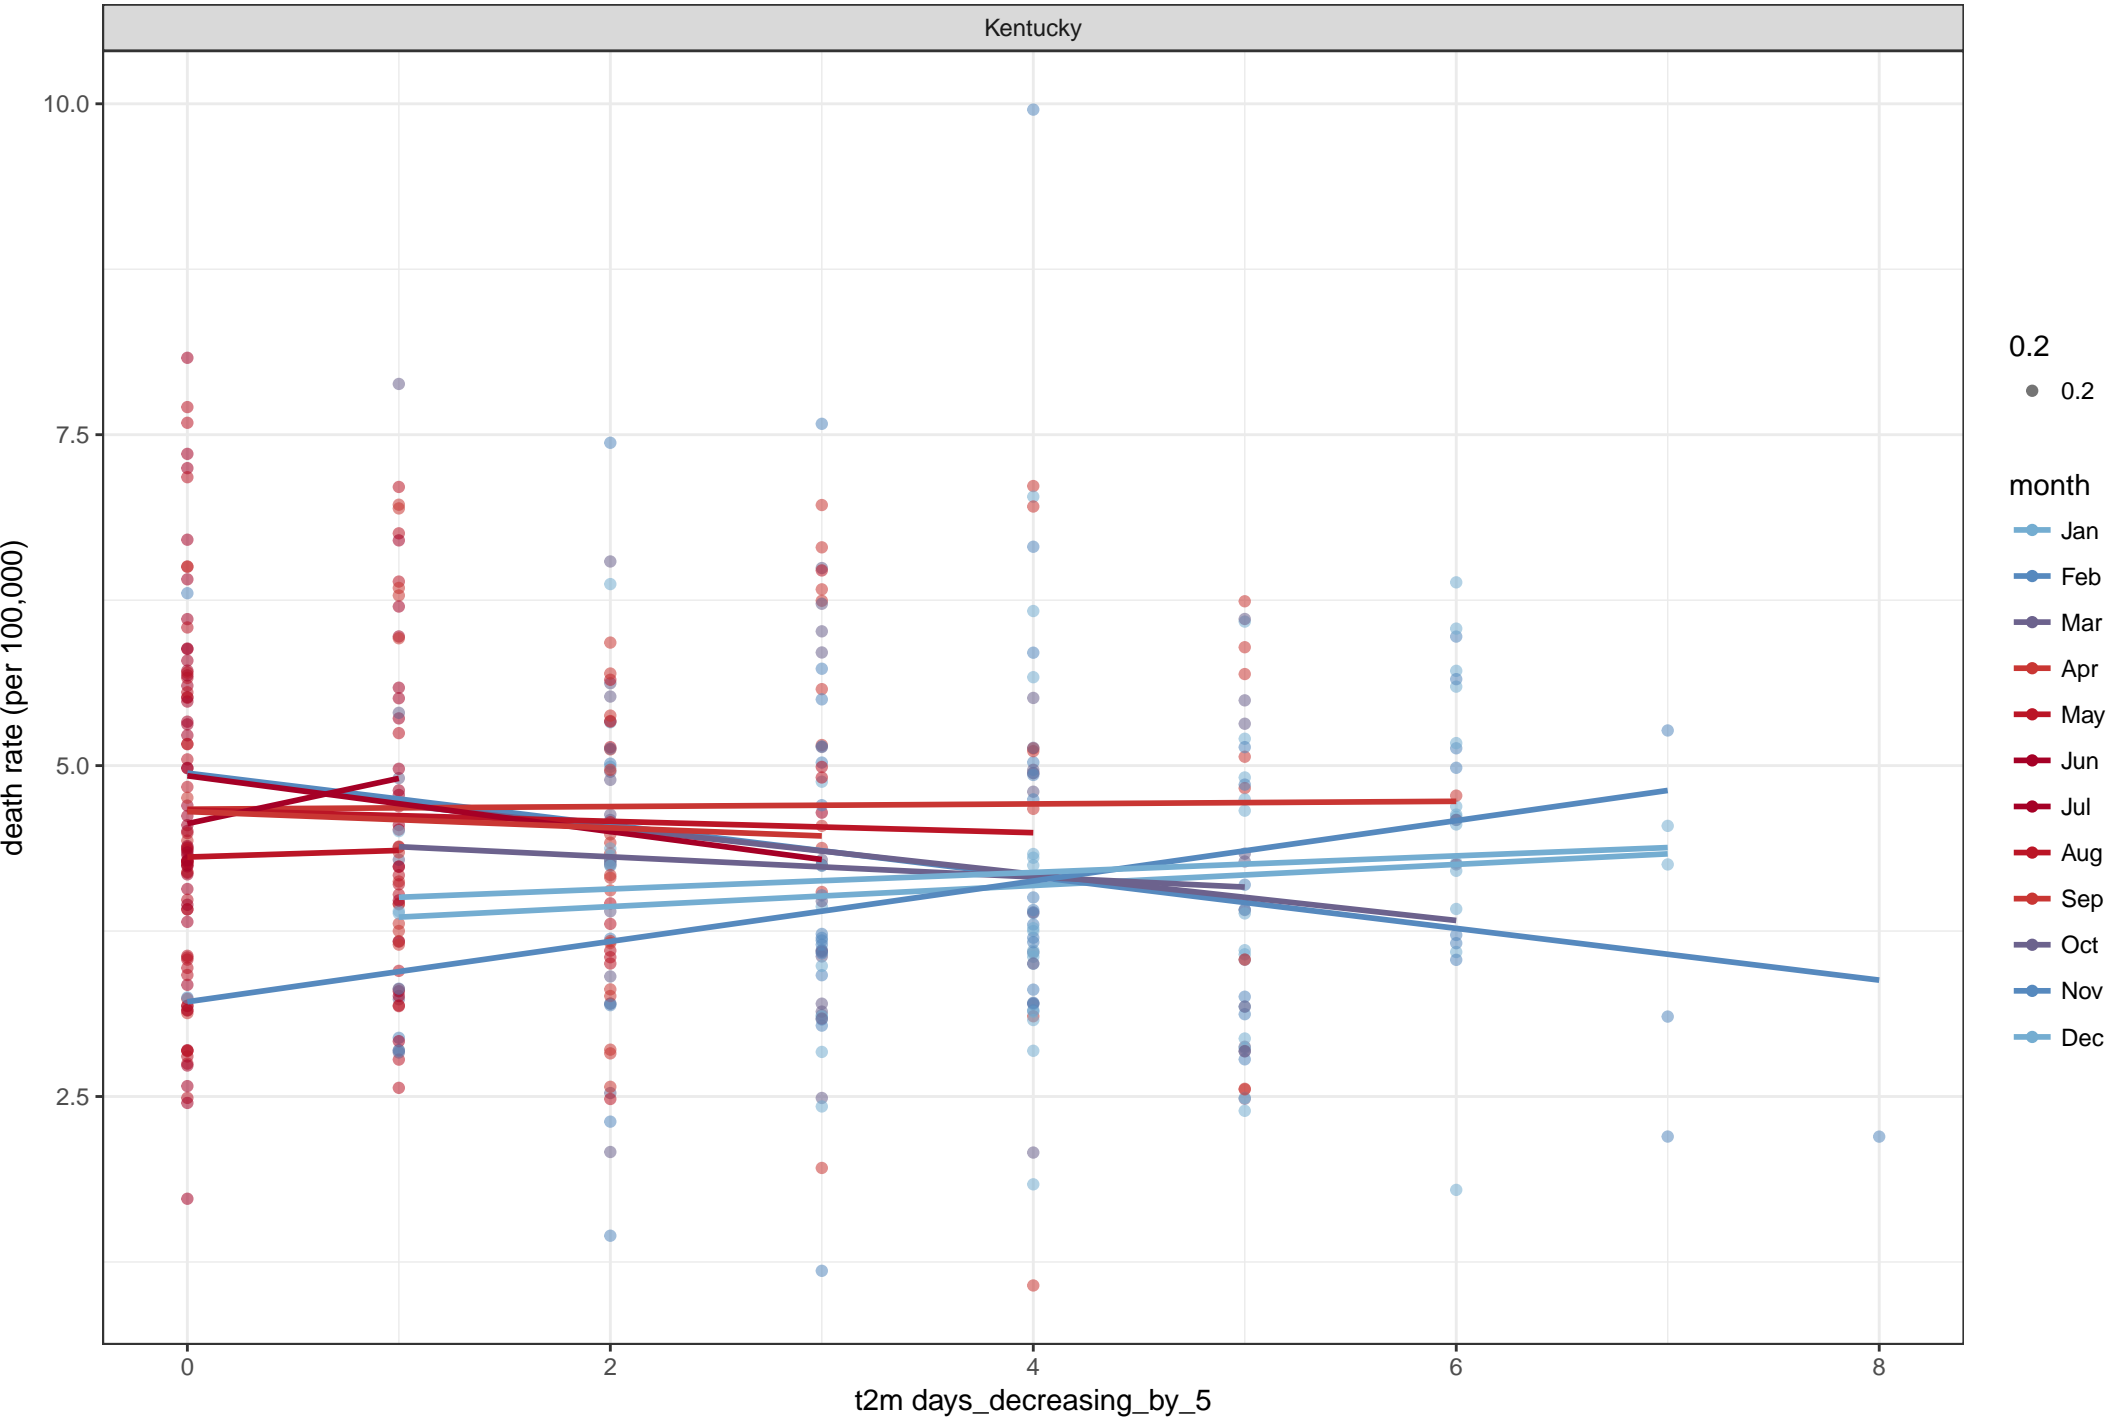

Death rates by state fitted by month 1982–2013 against t2m days\_decreasing\_by\_5 : female 15

Death rates by state fitted by month 1982–2013 against t2m days\_decreasing\_by\_5 : female 15

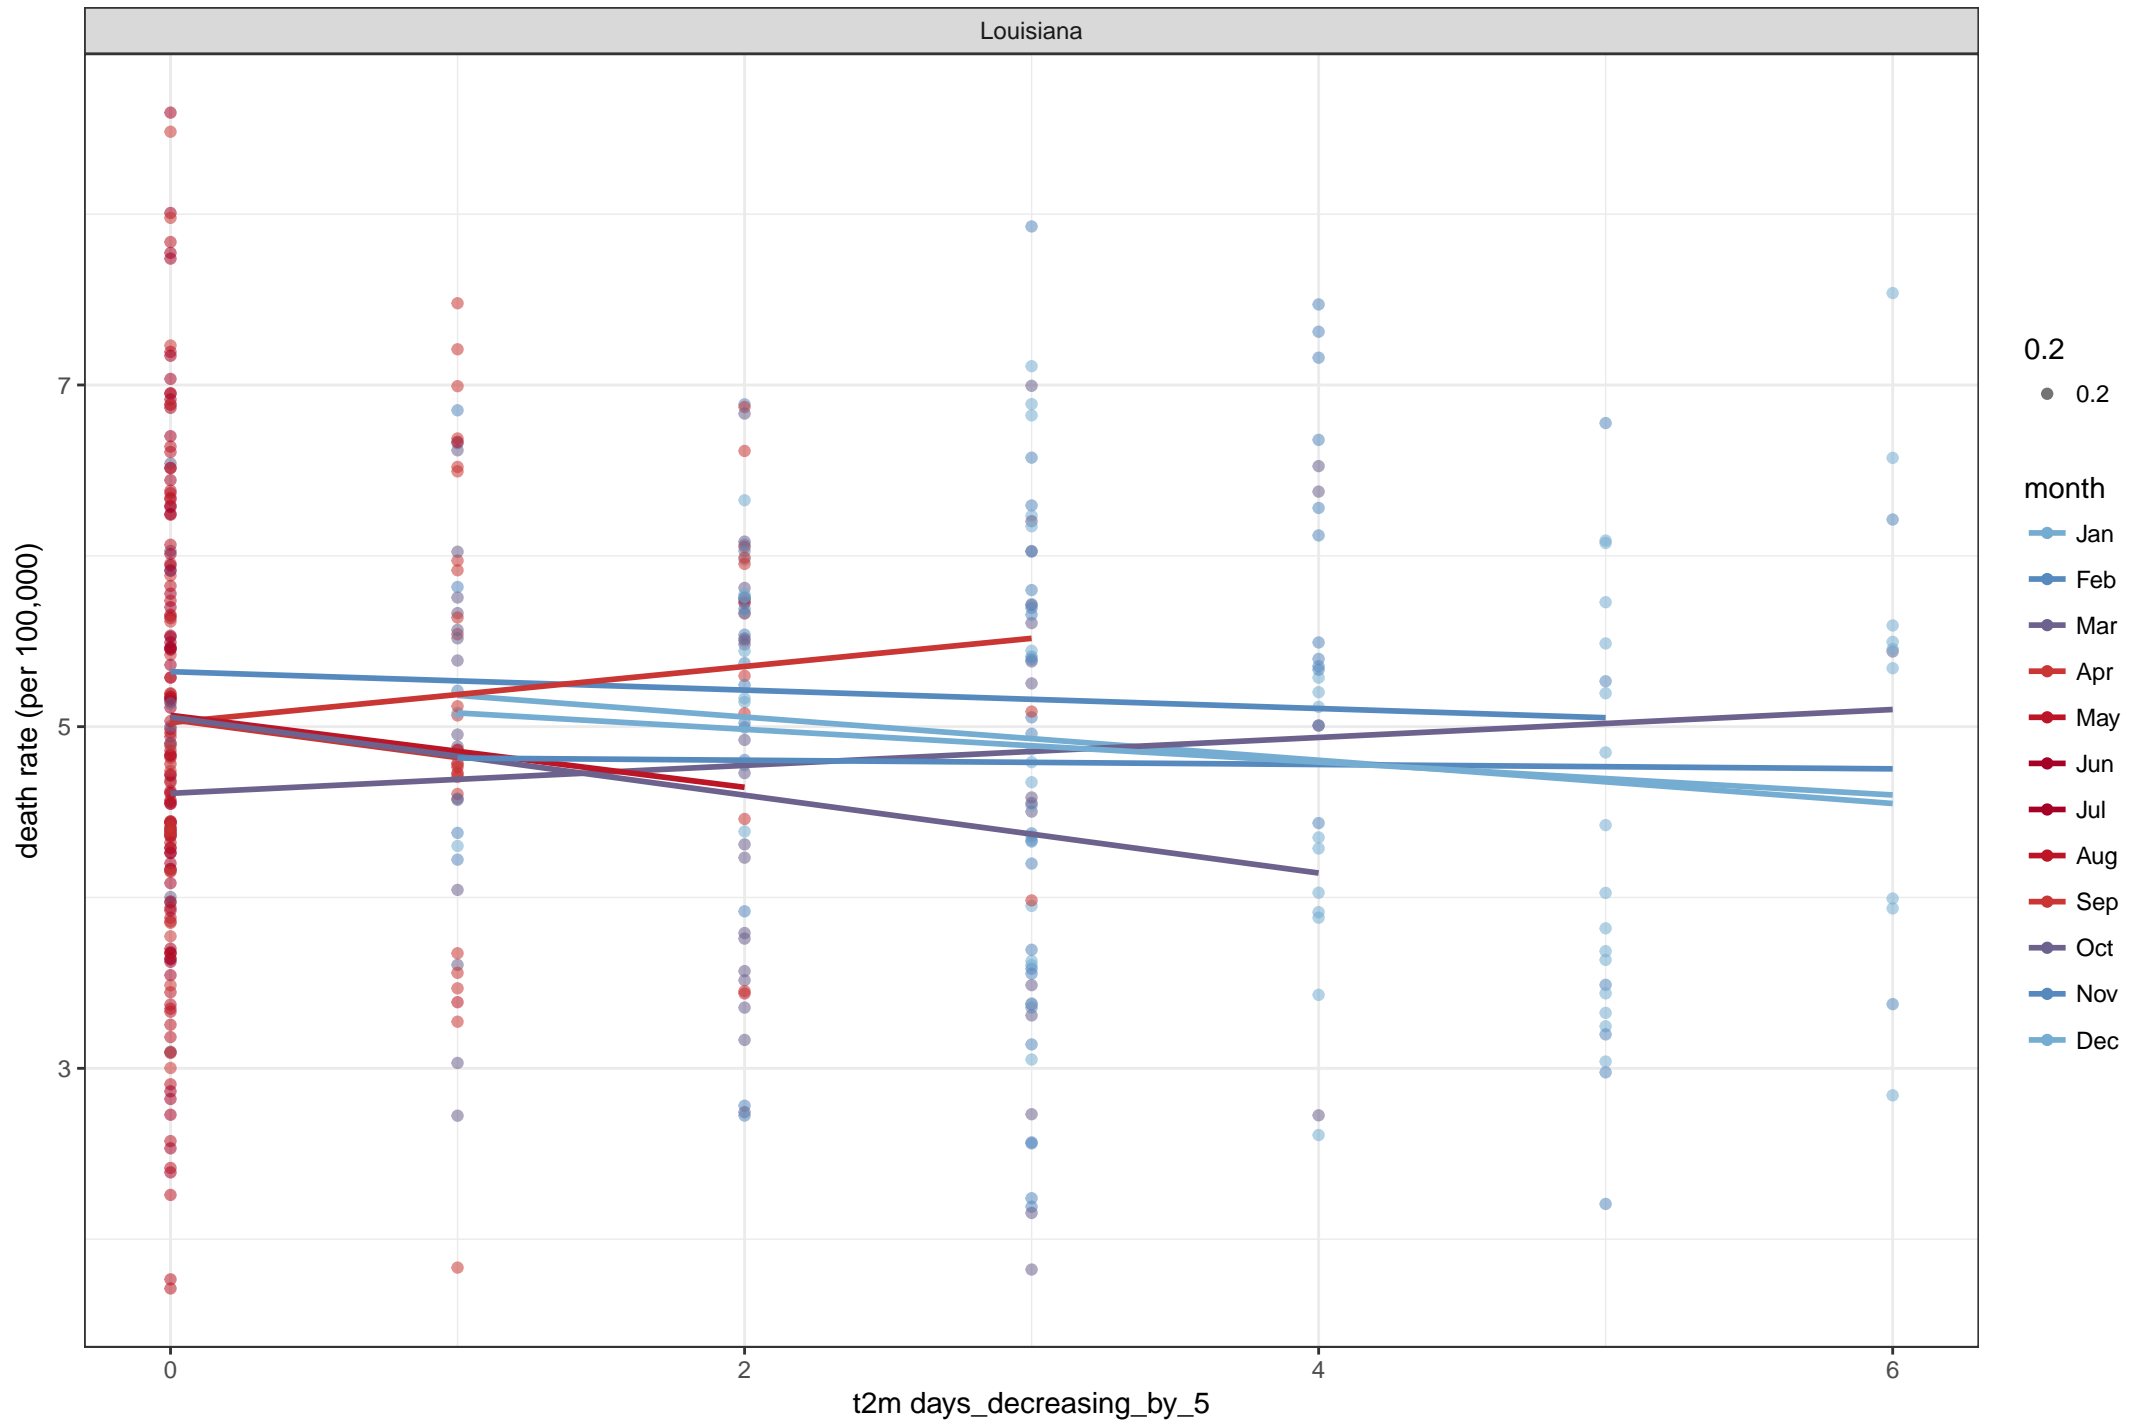

Death rates by state fitted by month 1982–2013 against t2m days\_decreasing\_by\_5 : female 15

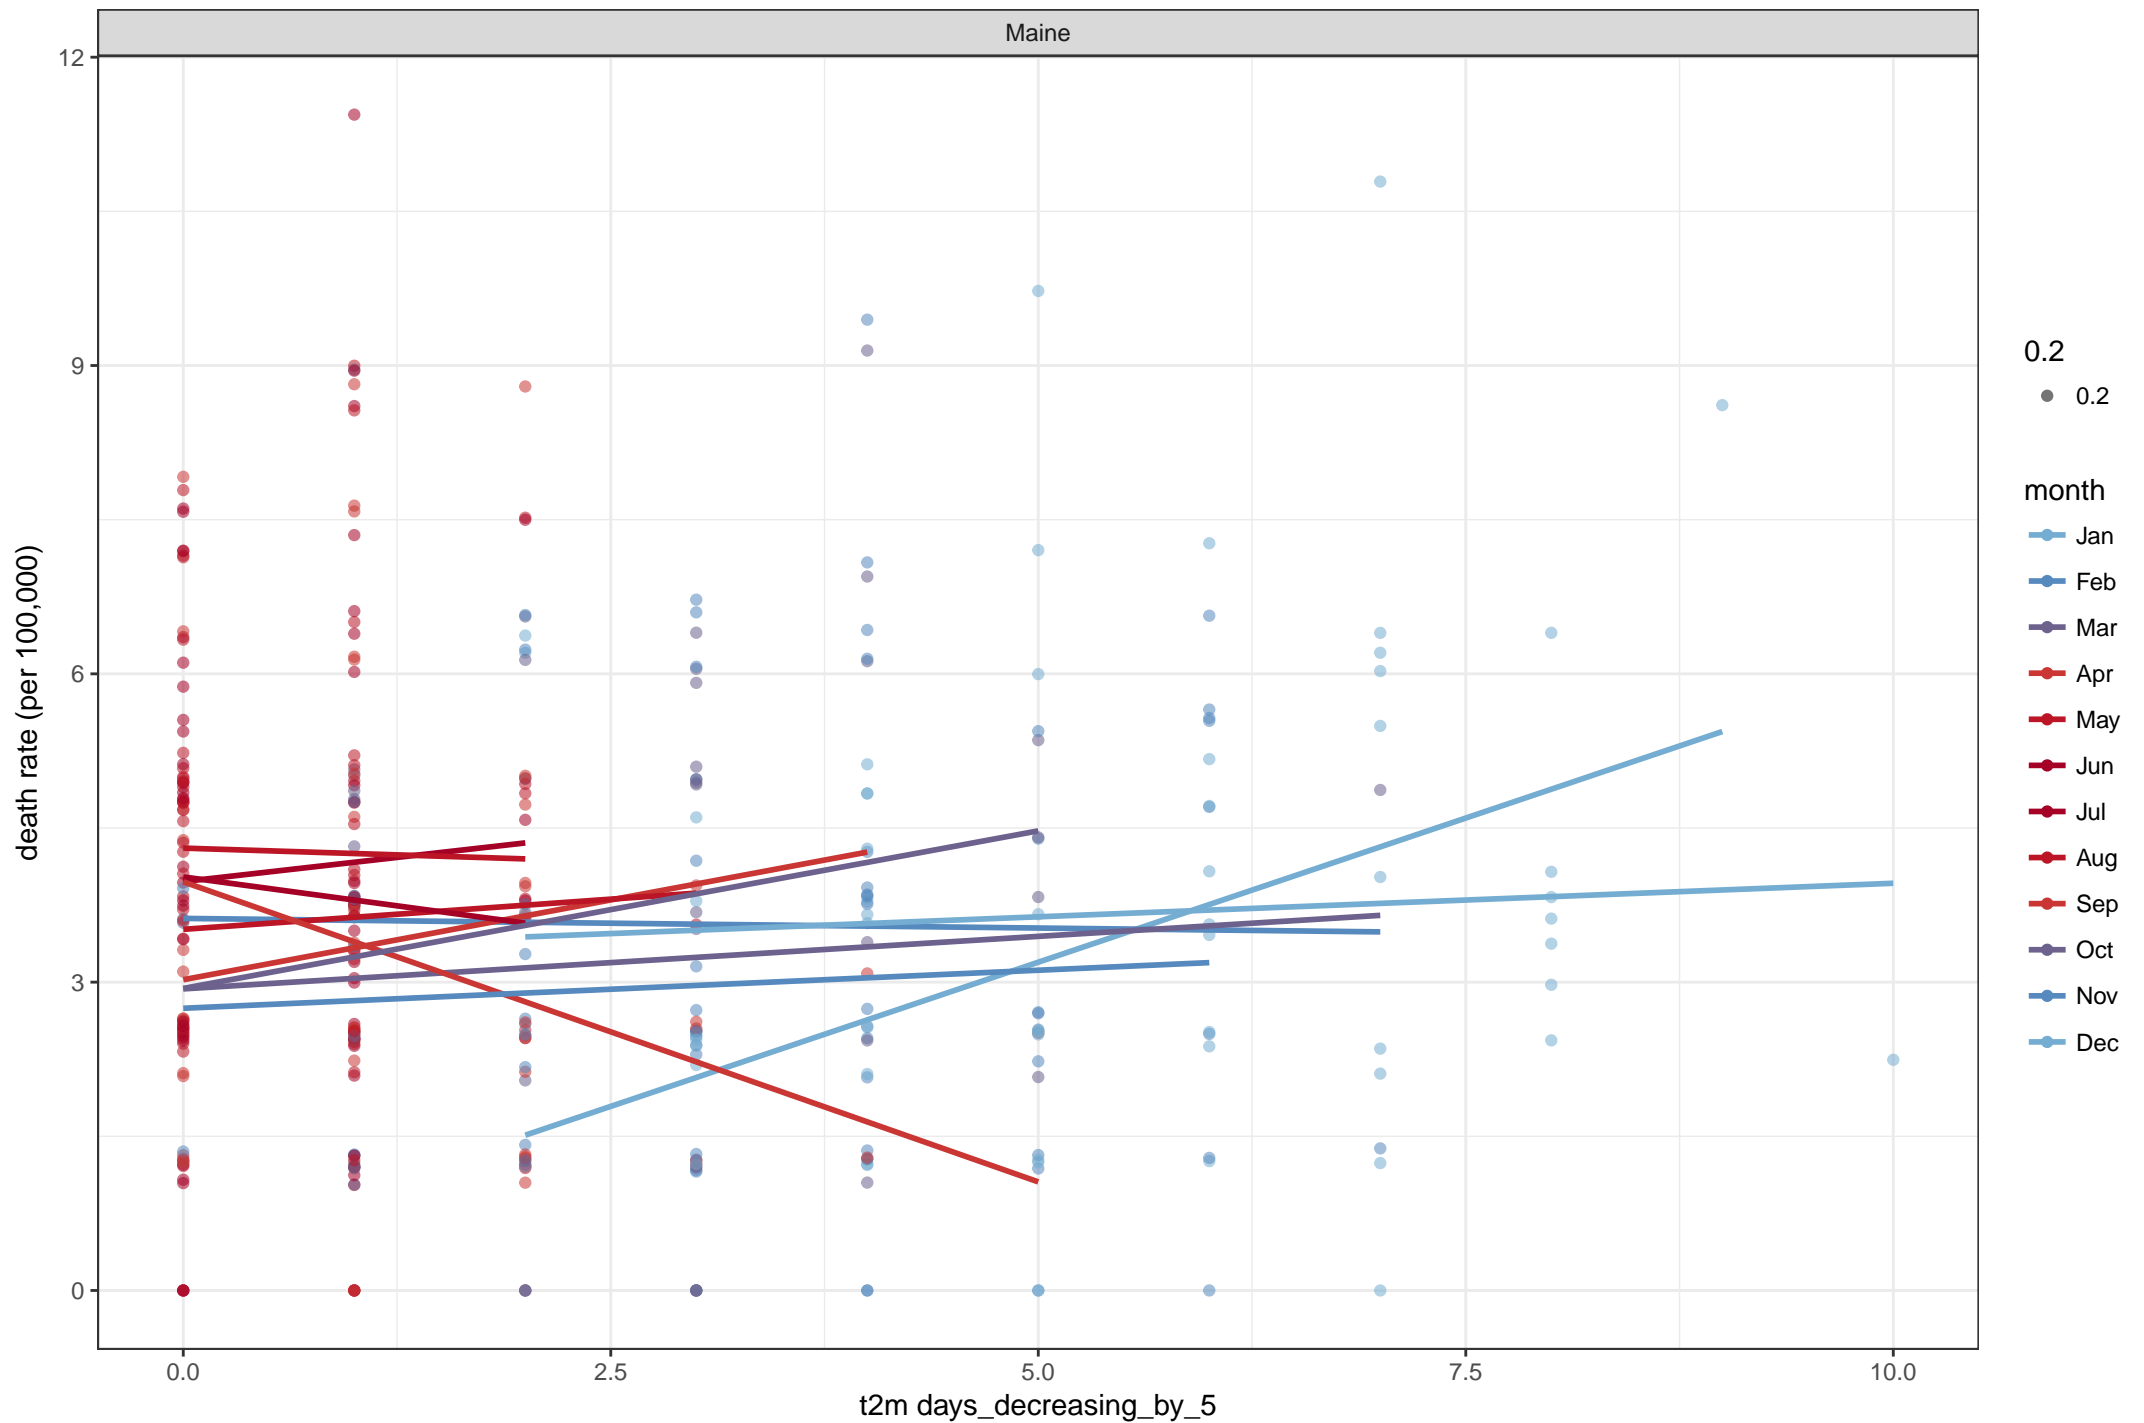

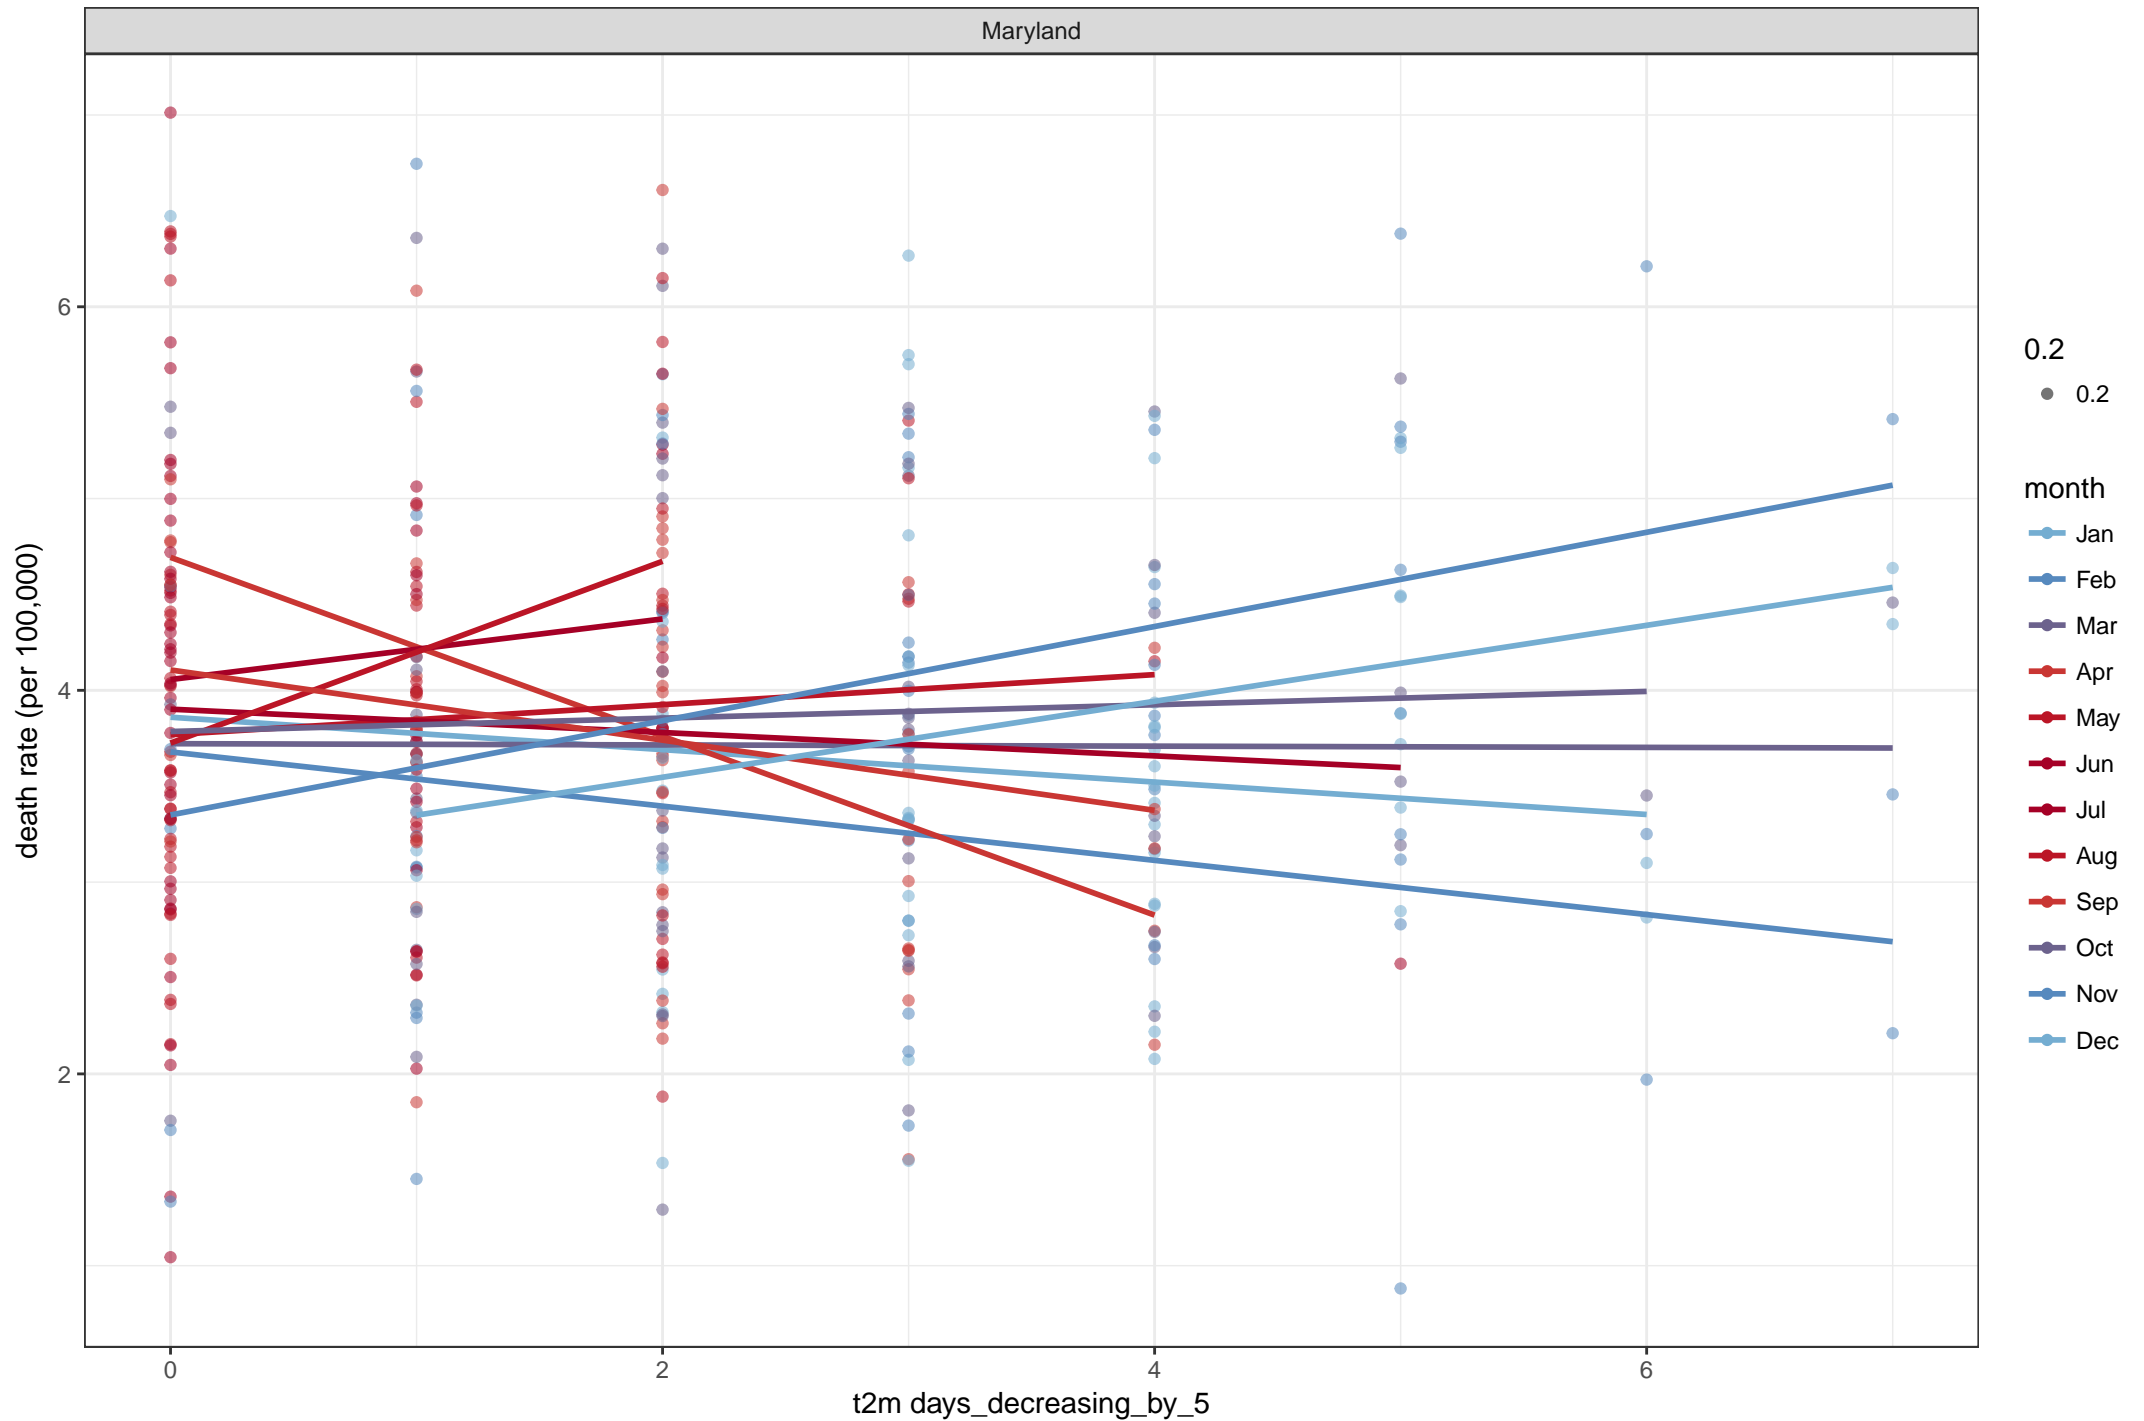

Death rates by state fitted by month 1982–2013 against t2m days\_decreasing\_by\_5 : female 15

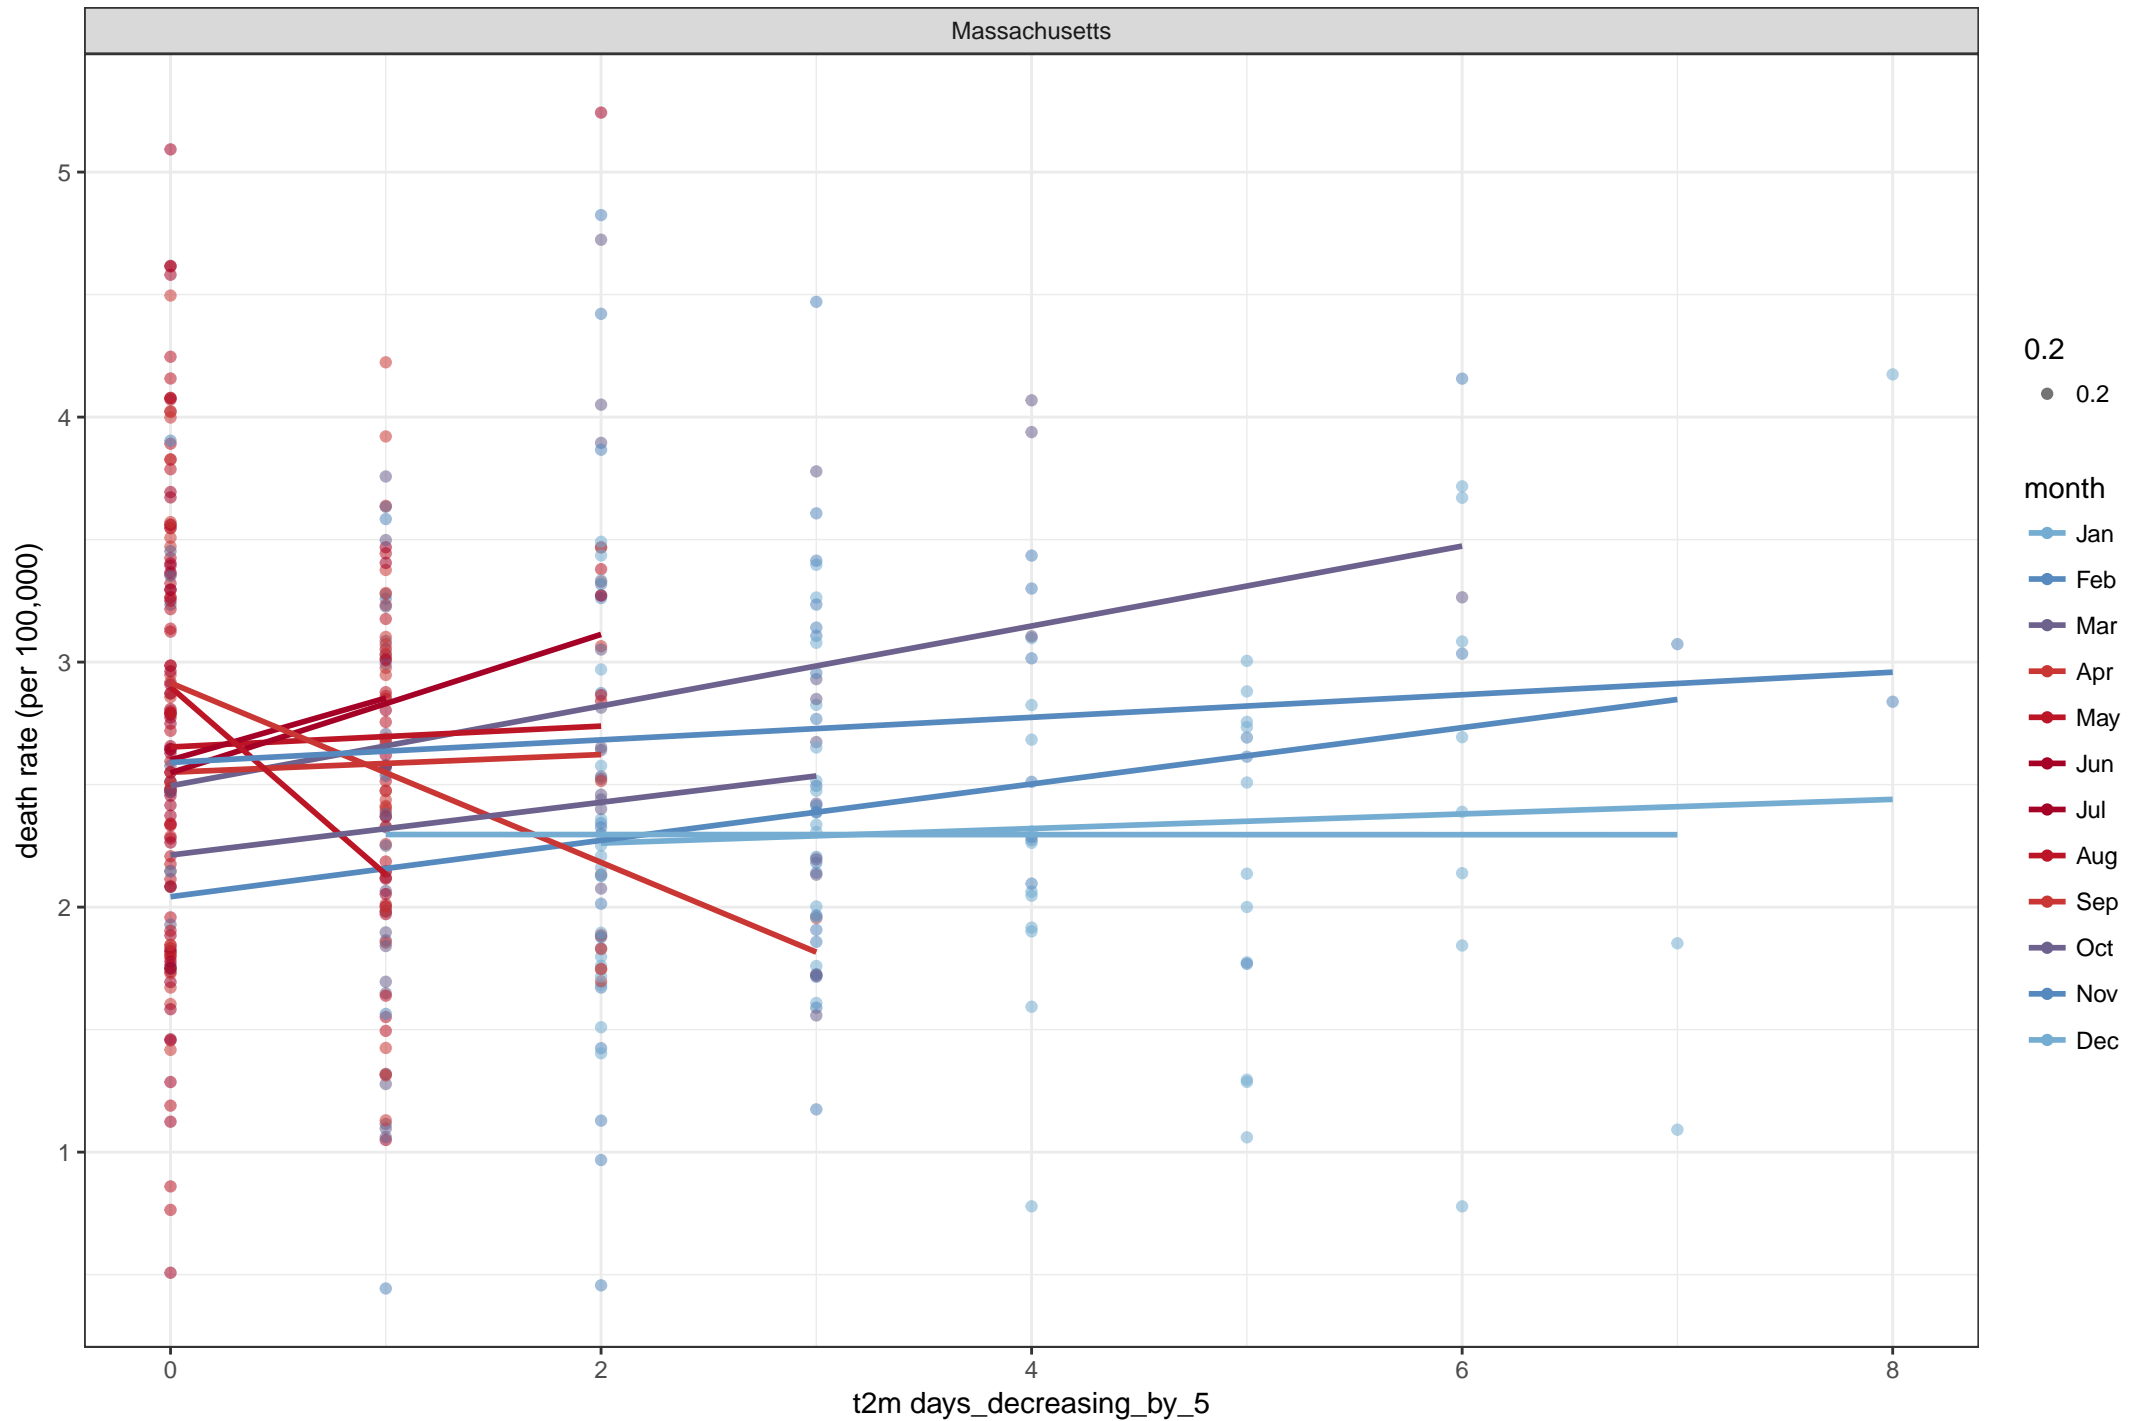

Death rates by state fitted by month 1982–2013 against t2m days\_decreasing\_by\_5 : female 15

Death rates by state fitted by month 1982–2013 against t2m days\_decreasing\_by\_5 : female 15

Death rates by state fitted by month 1982–2013 against t2m days\_decreasing\_by\_5 : female 15

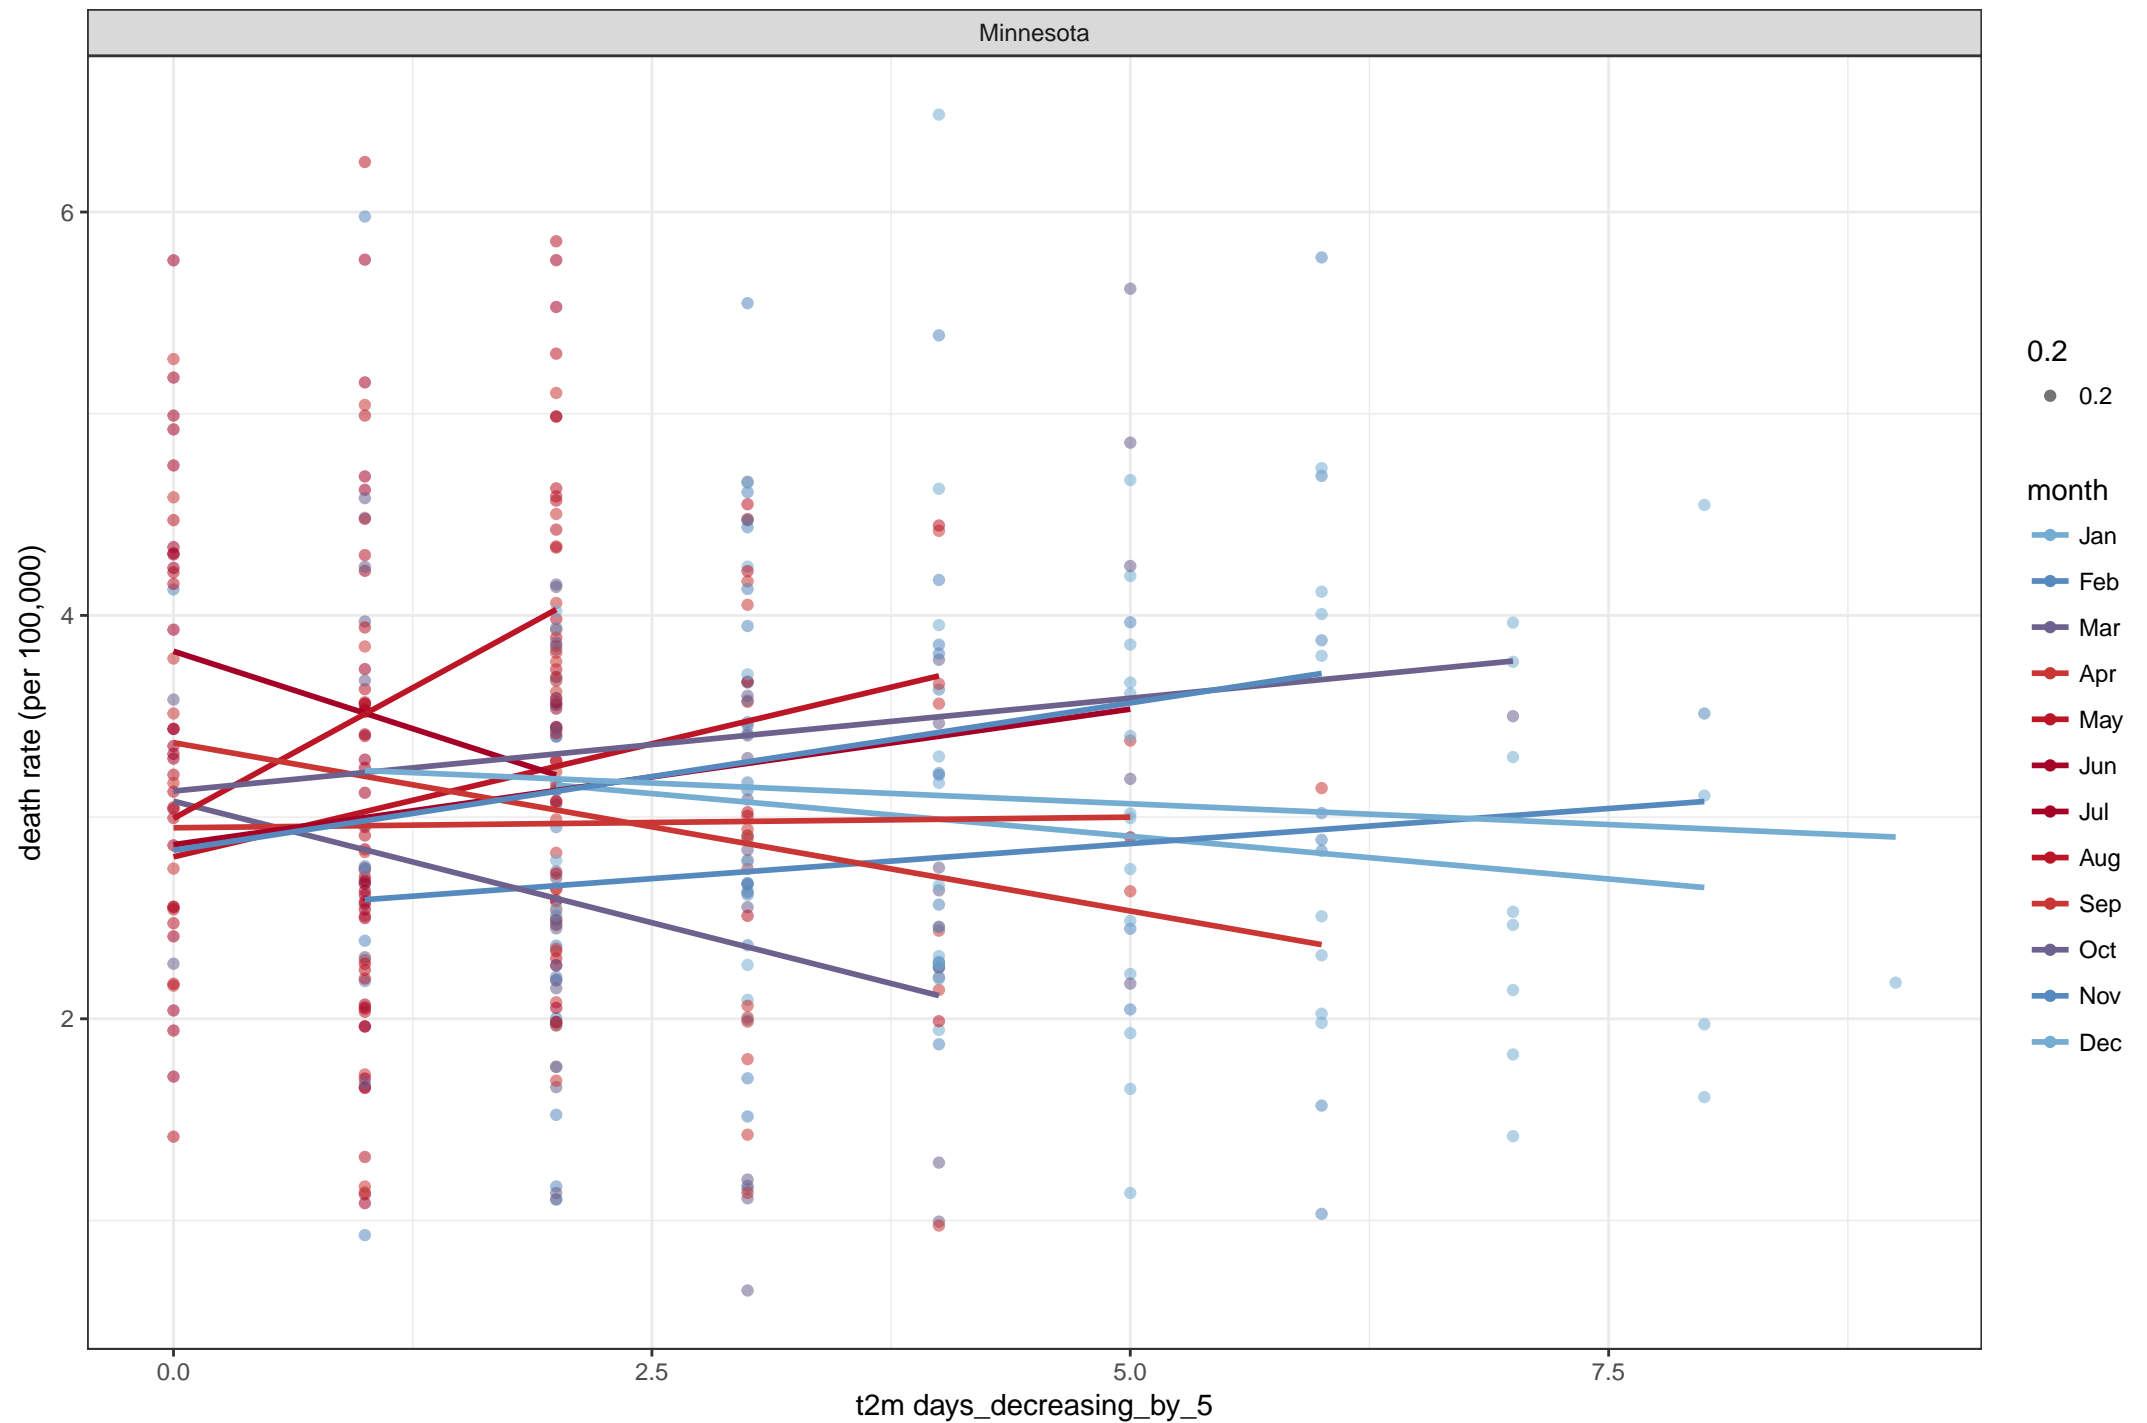

The figure is a line plot titled "Michigan". The x-axis is labeled "t2m days\_decreasing\_by\_5" and has major ticks at 0, 2, 4, and 6. The y-axis is unlabeled but has a grid. The plot displays data for three groups: red, blue, and grey. Each group has multiple data points at each x-axis tick, connected by lines. The red group shows a general upward trend in values from group 0 to group 2, while the blue and grey groups show more varied trends, with some lines increasing and others decreasing.
