Death rates by state fitted by month 1981–2009 against t2m days_decreasing_by_5 : Men 55

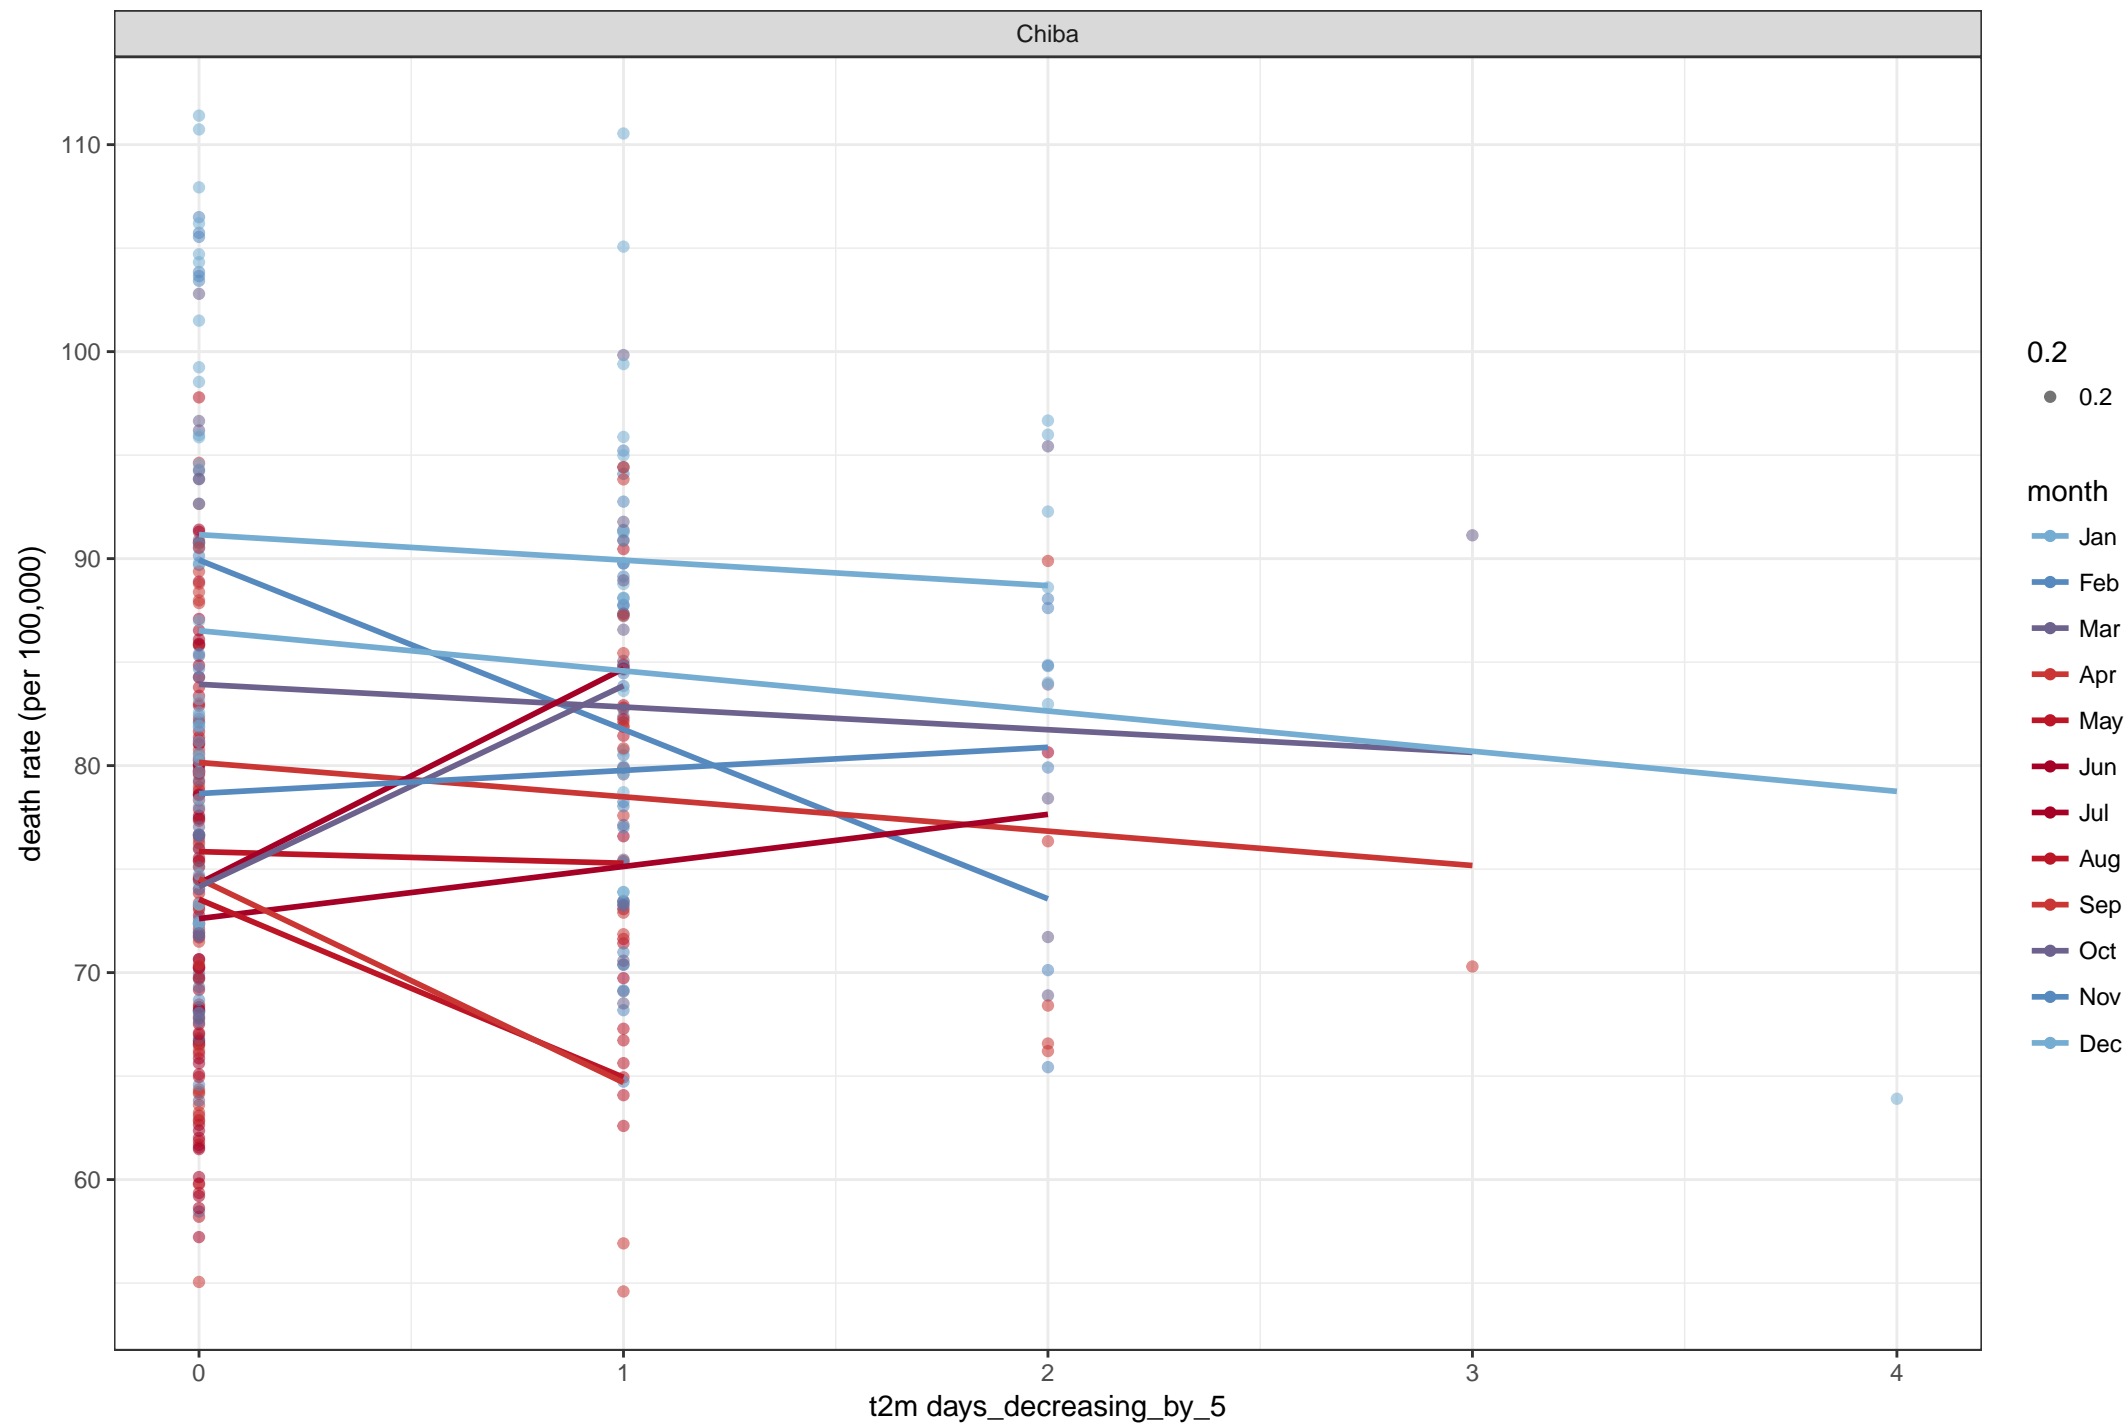

Death rates by state fitted by month 1981–2009 against t2m days_decreasing_by_5 : Men 55

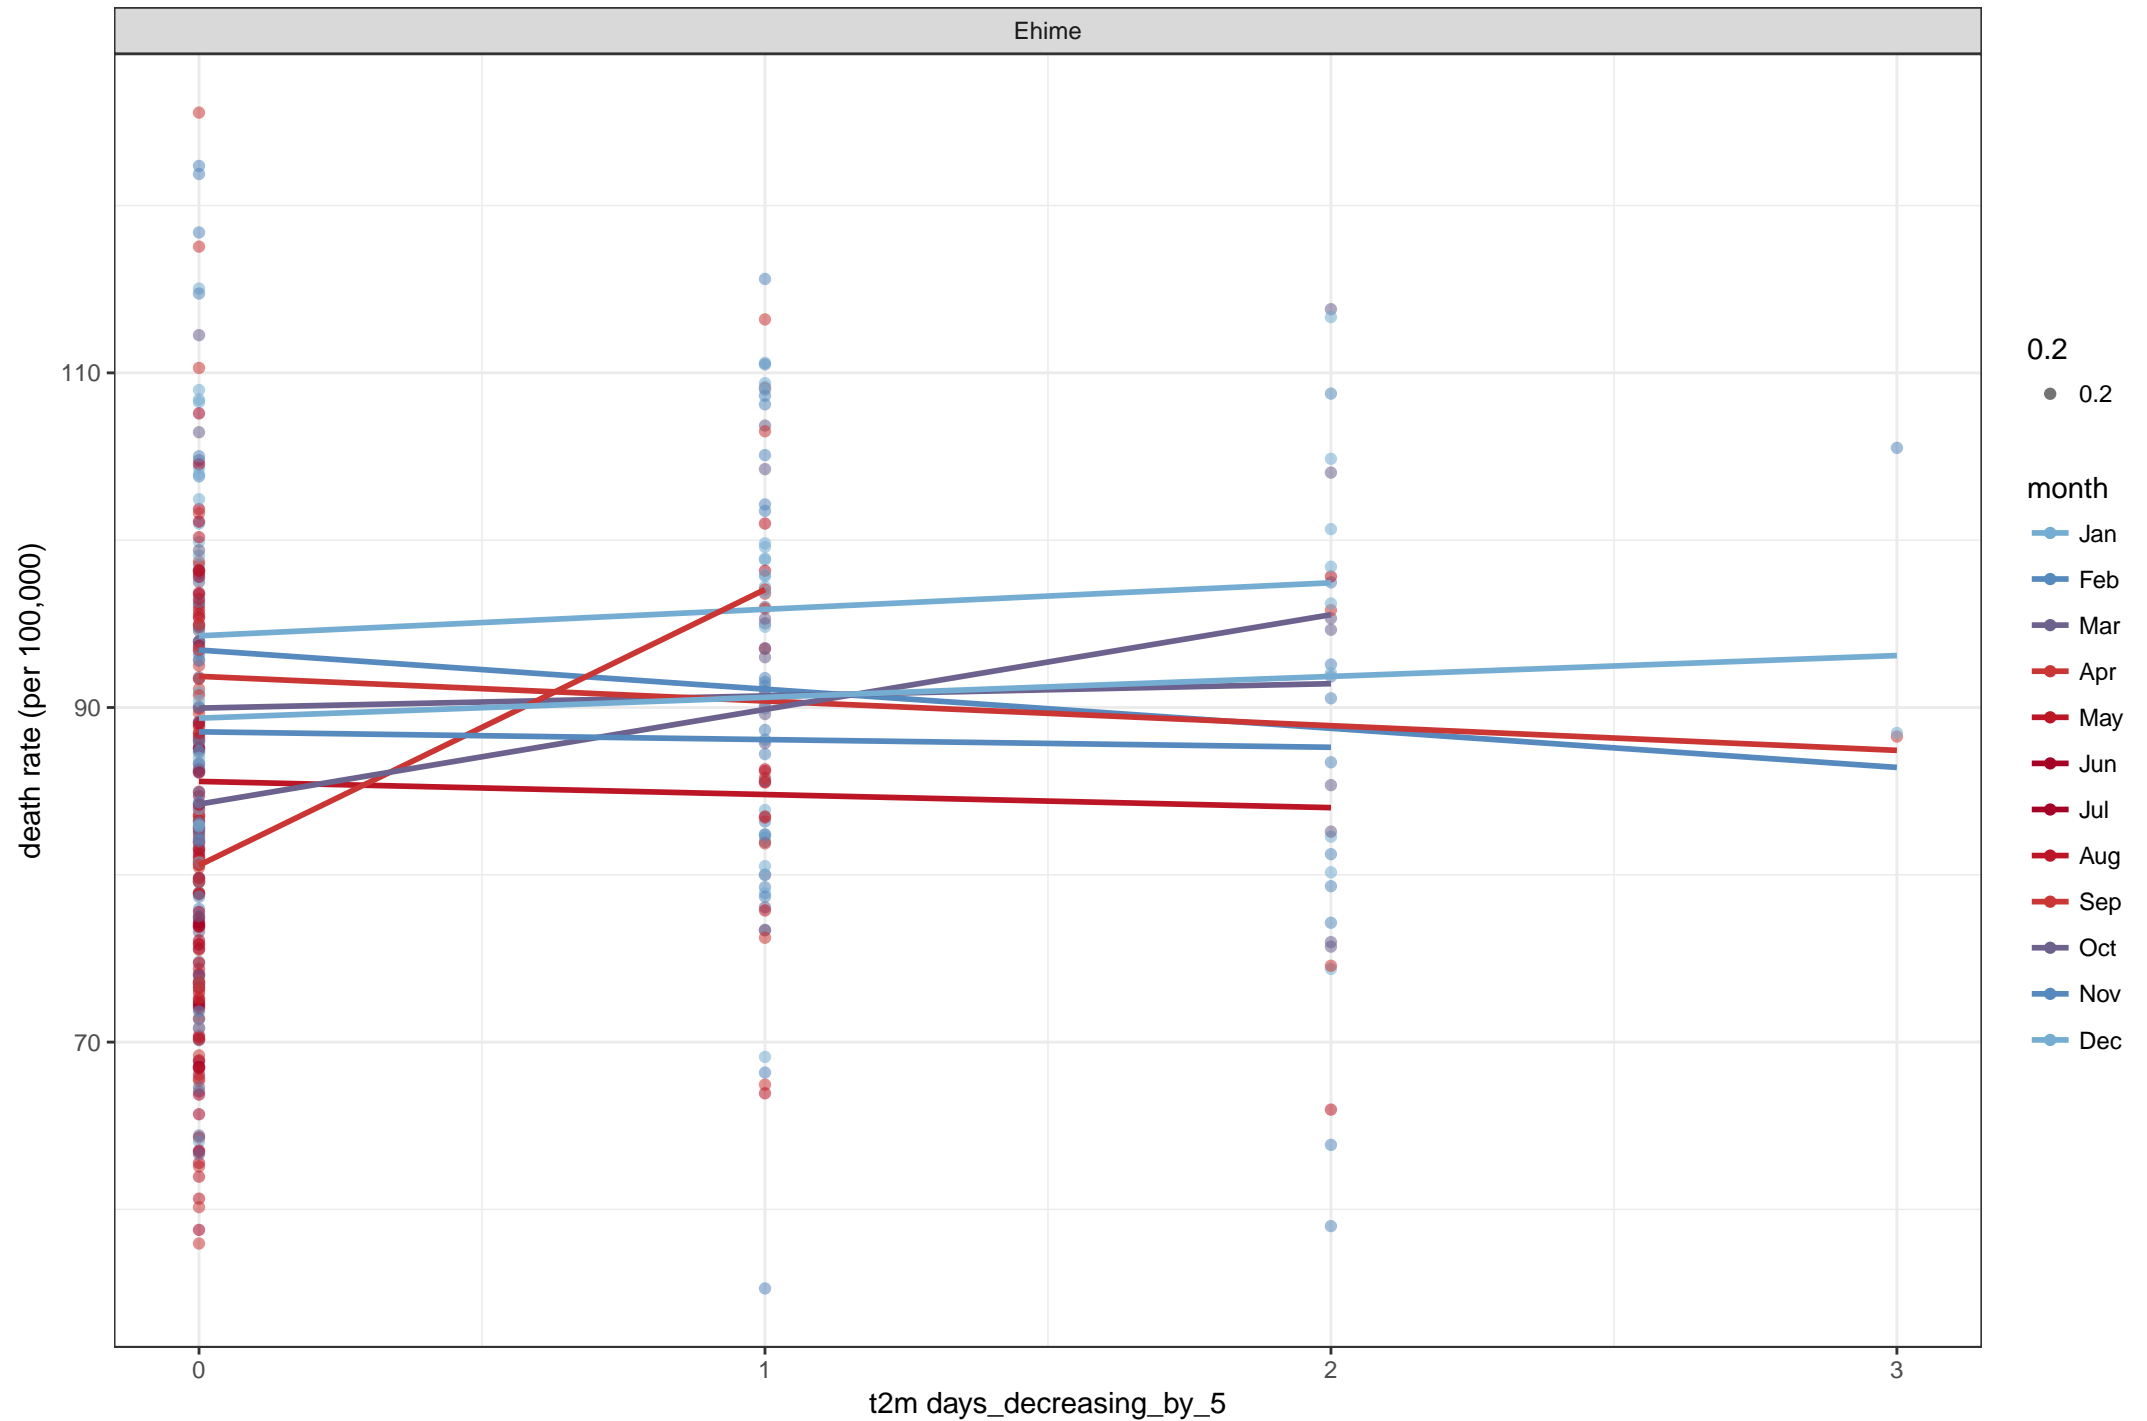

Death rates by state fitted by month 1981–2009 against t2m days_decreasing_by_5 : Men 55

The figure is a line plot titled "Nara". The x-axis is labeled "t2m days_decreasing_by_5" and has major ticks at 0, 1, 2, and 3. The y-axis is unlabeled but has a grid with 10 horizontal lines. The plot contains many data series, each represented by a line connecting points at x=0, x=1, x=2, and x=3. The series are color-coded: blue, red, and purple. Most series show an upward trend from x=0 to x=1, followed by a slight decrease or stabilization at x=2 and x=3. There is a high density of points at x=0, x=1, and x=2, with fewer points at x=3.
