Death rates by state fitted by month 1981–2009 against t2m mean : Women 5

Death rates by state fitted by month 1981–2009 against t2m mean : Women 5

Death rates by state fitted by month 1981–2009 against t2m mean : Women 5

Death rates by state fitted by month 1981–2009 against t2m mean : Women 5

This scatter plot displays the relationship between the mean 2m temperature (t2m mean) and the maximum 2m temperature (t2m max) for the location of Tokushima. The x-axis, labeled 't2m mean', ranges from 0 to 30. The y-axis, labeled 't2m max', ranges from 0 to 30. The data is categorized into three series based on color: blue, purple, and red. Each series consists of individual data points and a fitted curve. The blue series shows a general upward trend with a peak around t2m mean = 5. The purple series shows a more complex pattern with multiple peaks and troughs. The red series shows a sharp increase in t2m max as t2m mean increases beyond 20.
