The figure is a line plot titled "Tottori". The x-axis is labeled "t2m days_changing_by_5" and ranges from 0 to 5. The y-axis is unlabeled. The plot displays multiple data series represented by colored lines and points. A prominent red line starts at a low value at day 0, rises sharply to a high value at day 1, and then gradually declines through day 5. Several blue lines show more moderate fluctuations, generally staying between low and medium values. A few purple lines are also visible, showing slight upward trends. The data points are clustered at each integer day value, with a high density of points at day 0.
