Death rates by state fitted by month 1981–2009 against t2m sd : Men 5

A scatter plot showing the relationship between 'lwater' (x-axis) and 't2m sd' (y-axis). The x-axis ranges from approximately 1.5 to 4.5, with major ticks at 2, 3, and 4. The y-axis ranges from 0 to 10, with major ticks at 0, 5, and 10. The plot contains numerous data points colored in red, blue, and grey. Several regression lines are drawn across the plot, colored red, blue, and grey, representing different models or groups. The lines show varying slopes, with some indicating a positive correlation and others a negative correlation between the variables.
