Death rates by state fitted by month 1981–2009 against t2m days_above_30 : Women 15

This scatter plot, titled "Fukuoka", displays the relationship between an unlabeled y-axis variable and "t2m days_above_30" on the x-axis. The x-axis ranges from 0 to 8 with major ticks every 2 units. The y-axis has a grid of 10 horizontal lines but no numerical labels. The data is characterized by a very high density of points at x=0, with a few scattered points at x=1 and x=2. Two red lines originate from the x=0 cluster, diverging as they move to the right, suggesting a non-linear or conditional relationship.
