Death rates by state fitted by month 1981–2009 against t2m days\_changing\_by\_5 : Men 75

The figure is a line plot titled "Yamanashi". The x-axis is labeled "t2m days\_changing\_by\_5" and ranges from 0 to 5. The y-axis is unlabeled but has a grid. The plot displays multiple data series, each represented by a line connecting points at x=0, 1, 2, 3, 4, and 5. The lines are color-coded, with shades of blue, red, and purple. Most lines show a downward trend, indicating a decrease in the t2m days\_changing\_by\_5 over time. There are several outliers, particularly at x=0, where some points are significantly higher than the rest of the data. At x=1, there is a cluster of points for each line, suggesting multiple measurements or a distribution of values. The lines are generally thicker, and the points are small circles.
