Death rates by state fitted by month 1982–2013 against t2m days\_below\_10 : female 15

The figure is a scatter plot titled "Texas". The x-axis is labeled "t2m days\_below\_10" and ranges from 0 to 25. The y-axis is unlabeled. The plot shows a large number of data points, with a very high density of red points along the y-axis (x=0). Several regression lines are plotted: a purple line for the red data points, and several blue lines for other clusters of data points. The blue lines generally show a positive correlation between the x and y variables.
