Death rates by state fitted by month 1981–2009 against t2m days_increasing_by_5 : Women 75

The plot, titled "Ishikawa", displays the variable "t2m days_increasing_by_5" on the x-axis, with values 0, 1, 2, and 3. The y-axis is unlabeled. The data is represented by multiple colored lines (blue, red, purple) connecting points at each x-axis value. There are also numerous scattered points of the same colors at each x-axis value, suggesting a large number of individual observations or simulations. The lines show varying trends: some increase, some decrease, and some remain relatively flat between consecutive x-values.
