Death rates by state fitted by month 1981–2009 against t2m mean : Men 65

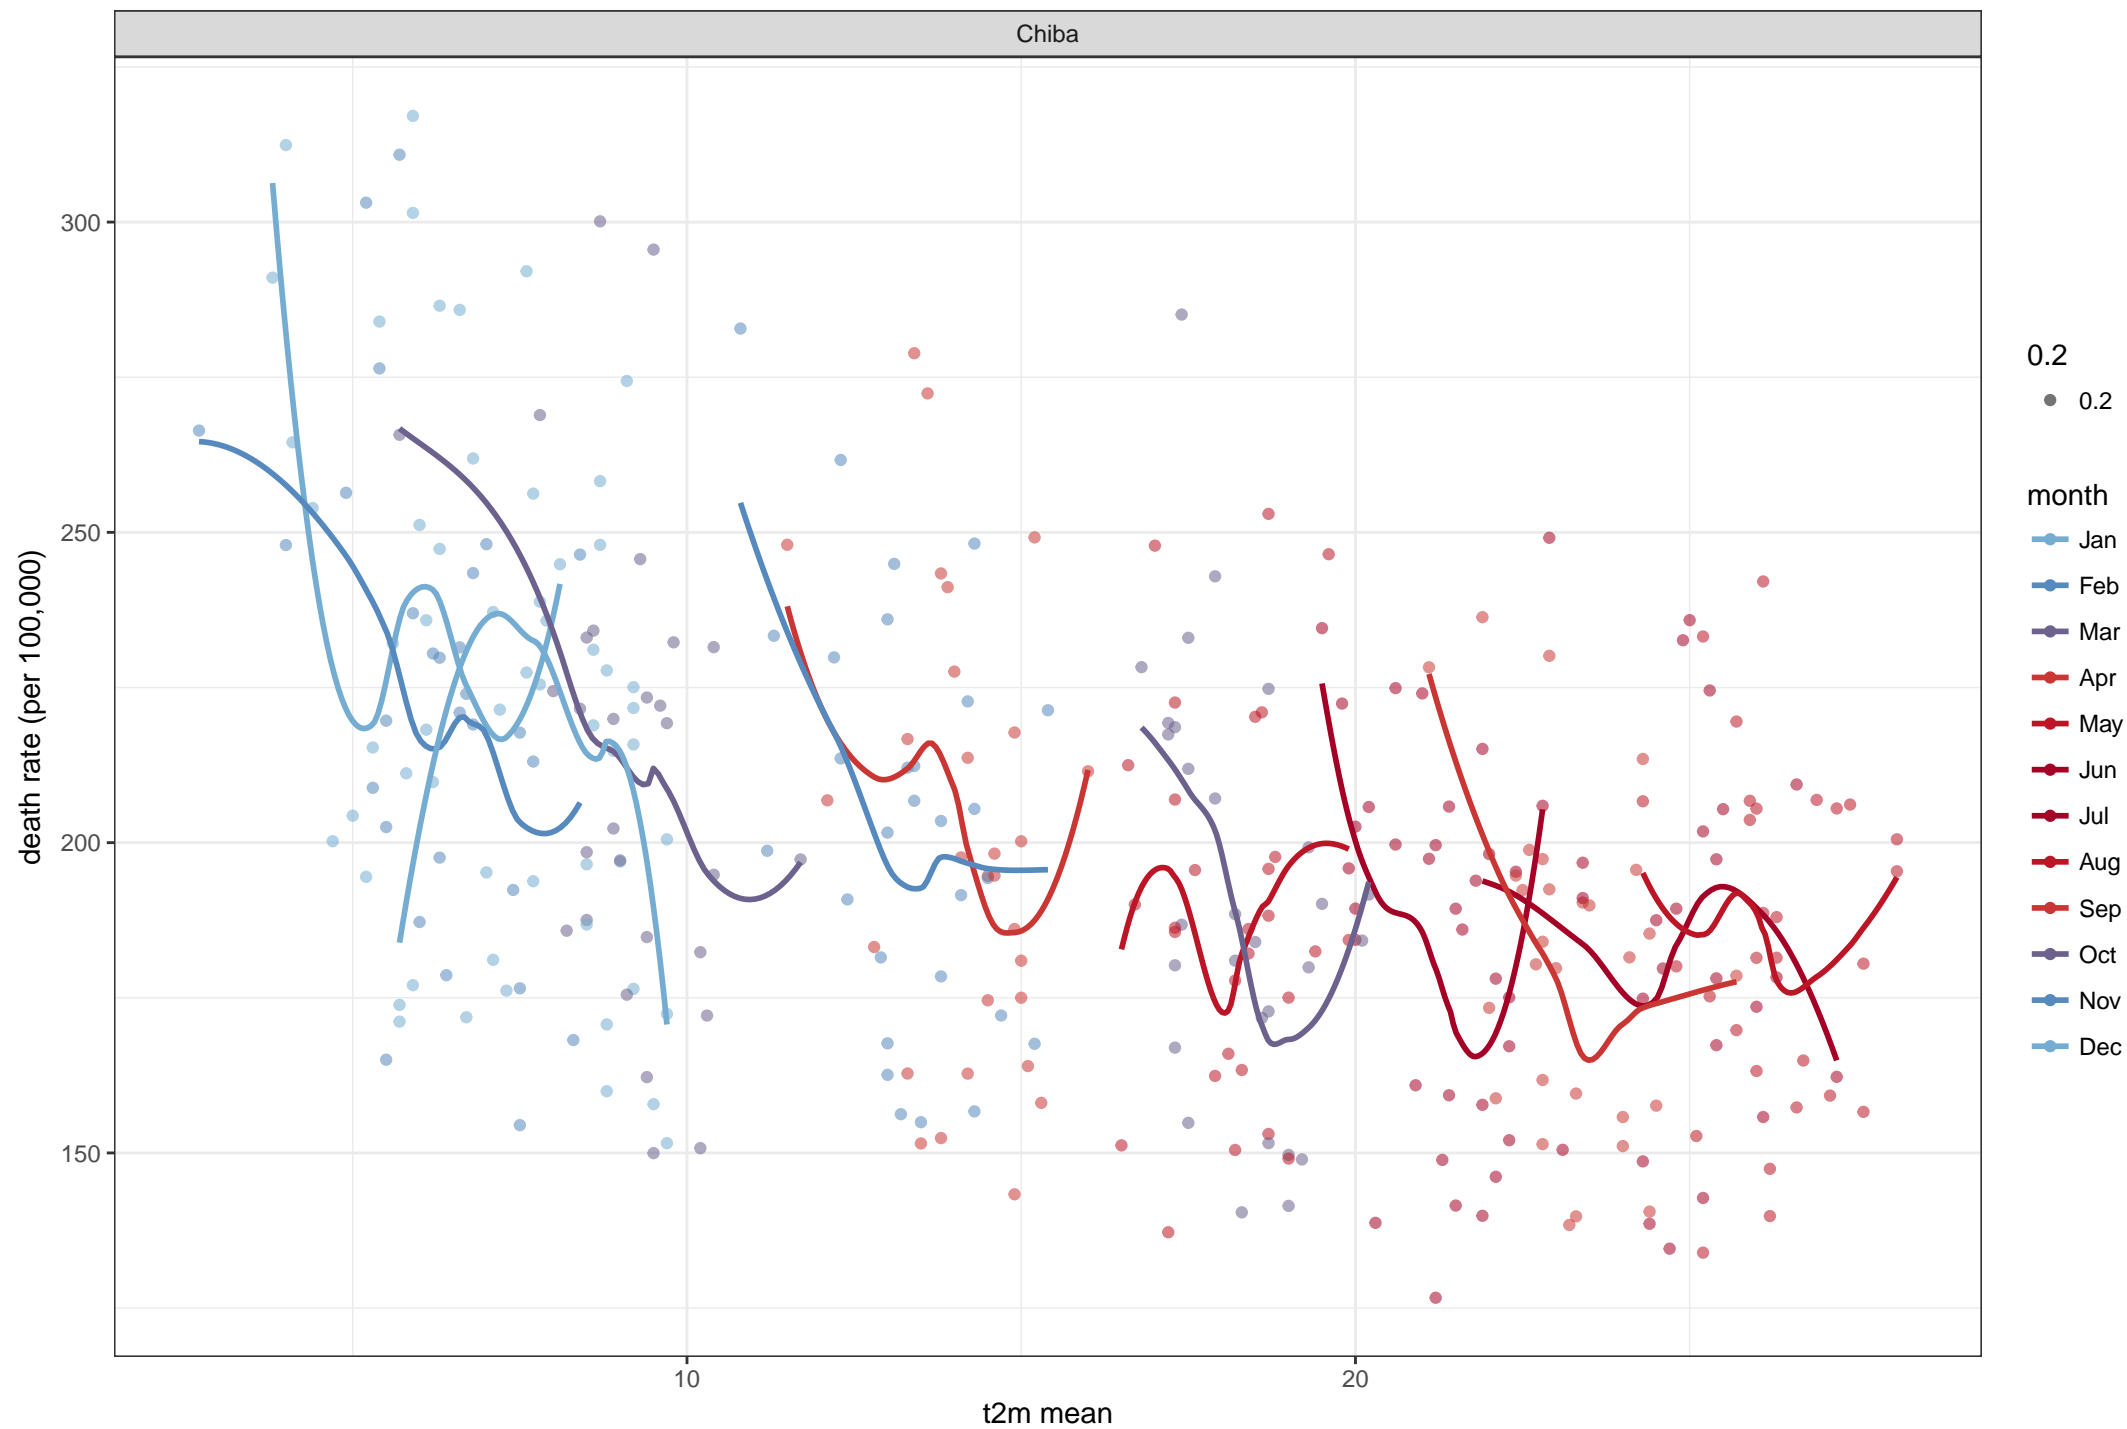

Death rates by state fitted by month 1981–2009 against t2m mean : Men 65

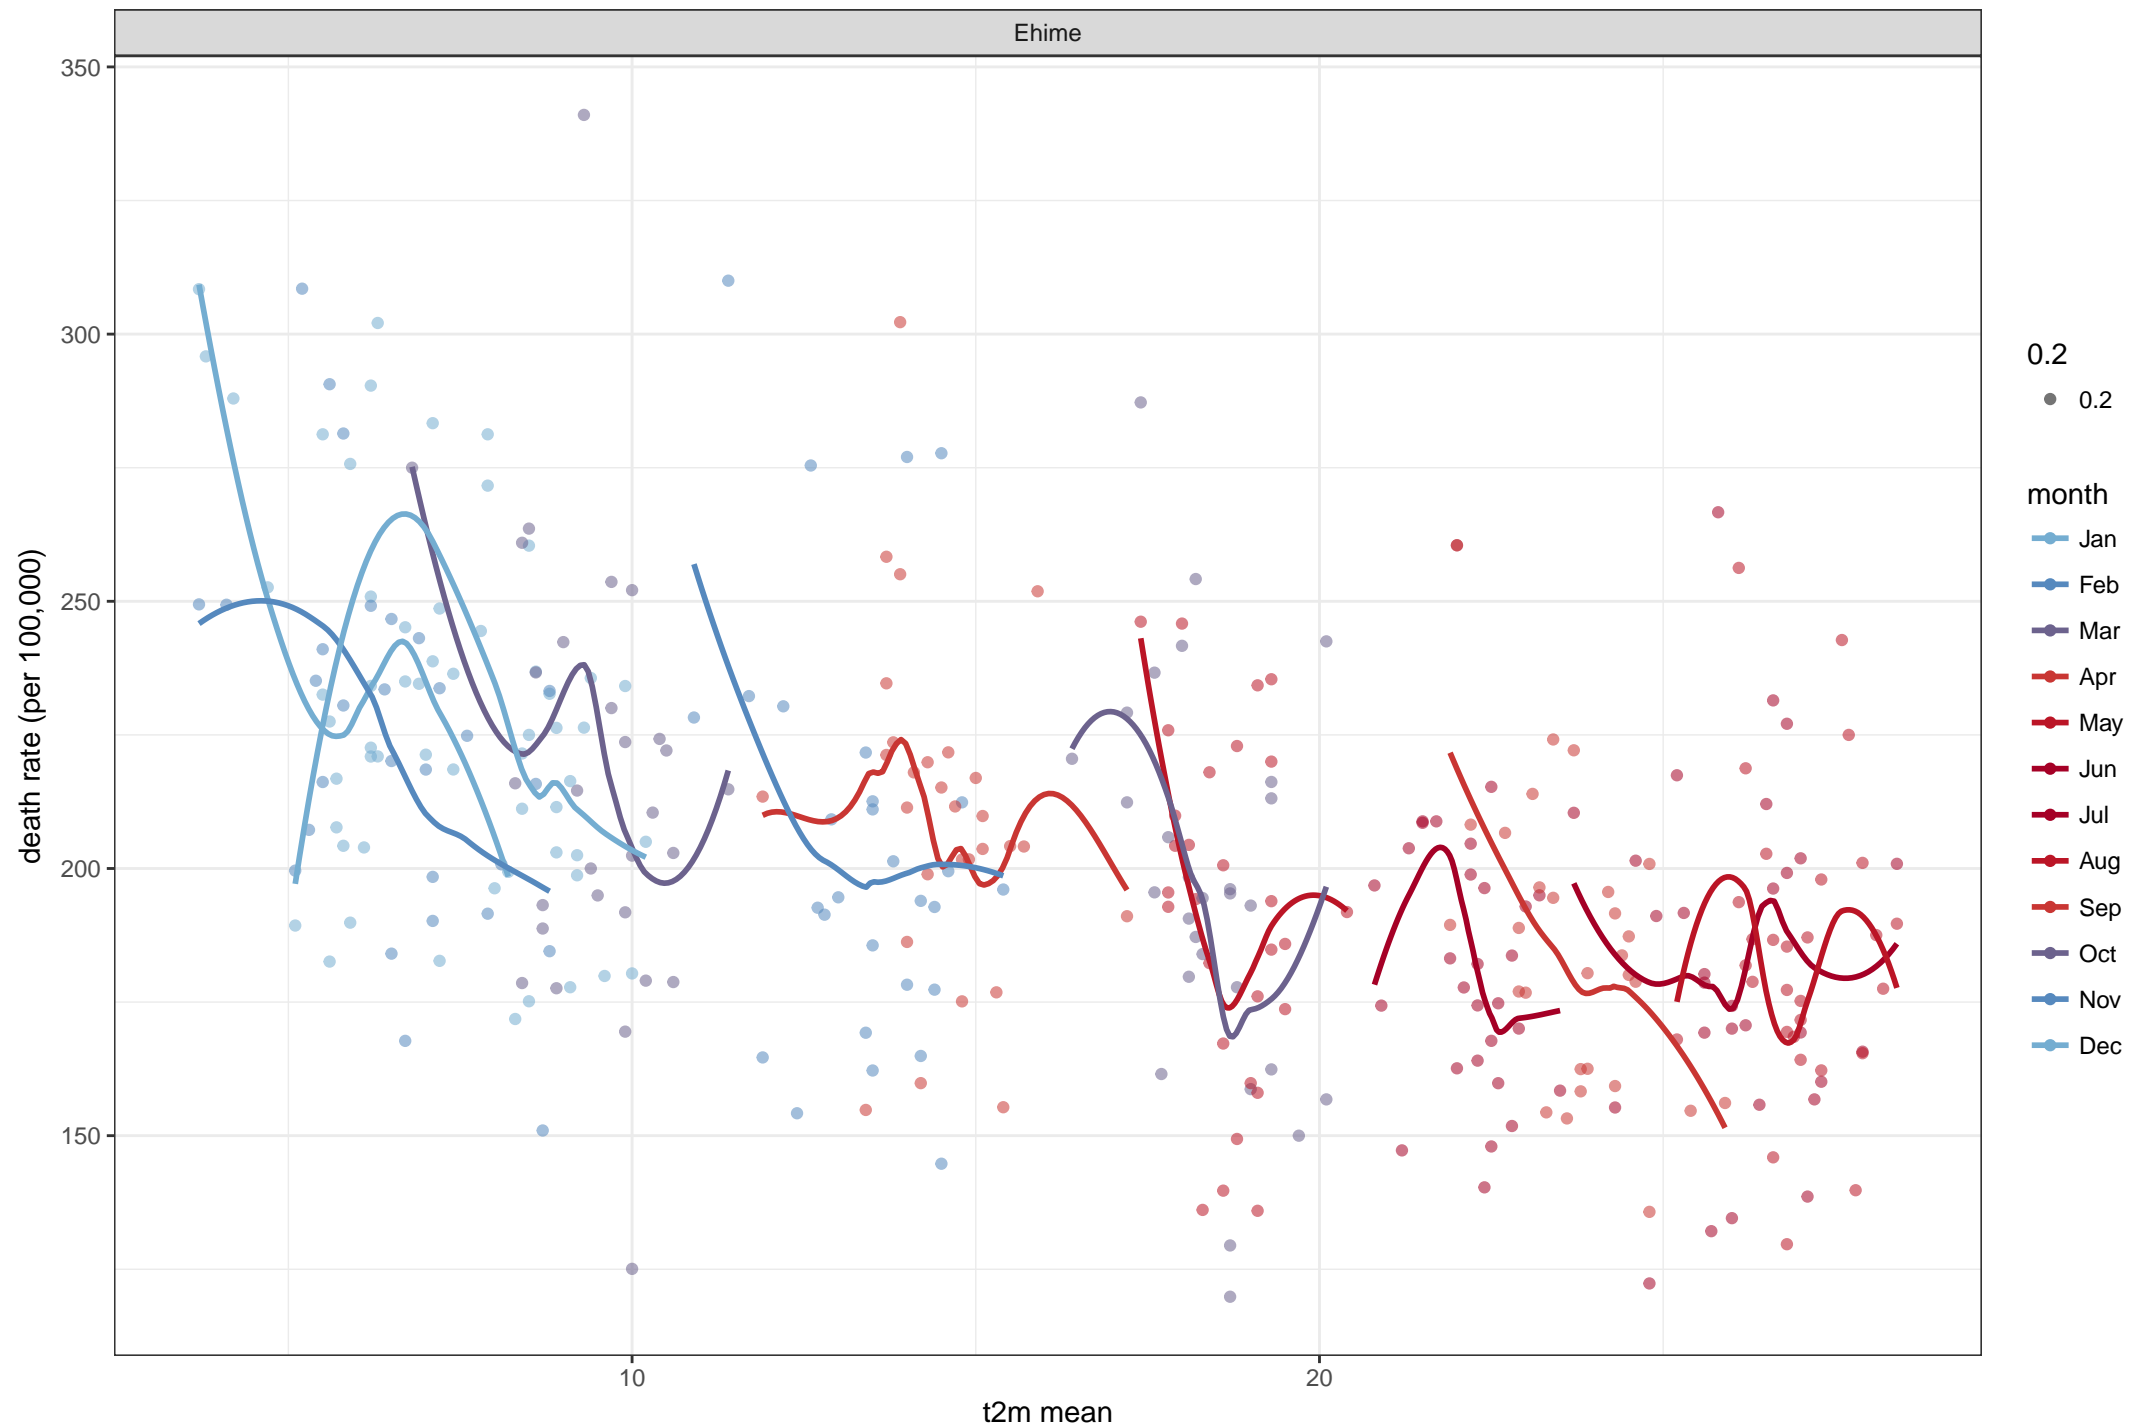

Death rates by state fitted by month 1981–2009 against t2m mean : Men 65

This scatter plot, titled "Yamanashi", displays the relationship between the t2m mean (x-axis) and an unlabeled y-axis. The data is categorized into three groups, each represented by a different color and a fitted curve:

- Blue Group:** Data points are concentrated at lower t2m mean values (approximately -5 to 5). The fitted curve shows a peak around t2m mean = -2.
- Purple Group:** Data points are spread across the middle range of t2m mean values (approximately 0 to 15). The fitted curve shows a peak around t2m mean = 2.
- Red Group:** Data points are concentrated at higher t2m mean values (approximately 10 to 25). The fitted curve shows a peak around t2m mean = 18.

The plot includes a light gray grid and a white background. The x-axis is labeled "t2m mean" and has major ticks at 0, 10, and 20. The y-axis is unlabeled but has major ticks at the bottom and top of the plot area.
