Death rates by state fitted by month 1981–2009 against t2m sd : Women 75

The figure is a scatter plot titled "Fukui". The x-axis is labeled "t2m sd" and has major tick marks at 1, 2, 3, and 4. The y-axis is unlabeled but features a horizontal grid line at the center. The plot contains a large number of data points, which are colored in three distinct groups: red, blue, and purple. Additionally, there are several regression lines drawn across the plot, colored to match the data points (red, blue, and purple). These lines show varying slopes and intercepts, suggesting different relationships between the variables for each group. The overall distribution of points is spread across the x-axis range from approximately 0.8 to 4.5, with y-values ranging from below the center line to above it.
