Death rates by state fitted by month 1981–2009 against t2m days_changing_by_5 : Men 55

The figure is a line plot titled "Ehime". The x-axis is labeled "t2m days_changing_by_5" and ranges from 0 to 4. The y-axis is unlabeled. The plot shows a large number of data series, each represented by a line connecting points at x=0, 1, 2, 3, and 4. The points are colored red, blue, or purple. Most series are horizontal, indicating that the value does not change across the x-axis categories. A few series show slight increases or decreases, particularly between x=0 and x=1, and between x=1 and x=2. The overall distribution of points is dense, with many series clustered together at each x-axis value.
