Death rates by state fitted by month 1982–2013 against t2m days_decreasing_by_5 : female 0

Death rates by state fitted by month 1982–2013 against t2m days_decreasing_by_5 : female 0

Death rates by state fitted by month 1982–2013 against t2m days_decreasing_by_5 : female 0

Death rates by state fitted by month 1982–2013 against t2m days_decreasing_by_5 : female 0

The figure is a scatter plot titled "Indiana". The x-axis is labeled "t2m days_decreasing_by_5" and ranges from 0 to 7. The y-axis is unlabeled. The plot displays data points and connecting lines for three categories: red, blue, and purple. The red points and lines are concentrated at x=0 and x=1. The blue points and lines are spread across x=0, x=1, x=2, x=3, x=4, x=5, x=6, and x=7. The purple points and lines are concentrated at x=1, x=2, x=3, and x=4. The lines represent a trajectory or change over the x-axis variable.
