Death rates by state fitted by month 1981–2009 against t2m days_below_10 : Women 75

The figure is a scatter plot titled "Fukushima". The x-axis is labeled "t2m days_below_10" and ranges from 0 to 30. The y-axis is unlabeled. The plot displays three data series: red, blue, and purple. Each series has a corresponding linear regression line. The red series shows a positive correlation, the blue series shows a positive correlation, and the purple series shows a negative correlation. The data points are scattered across the plot, with a high density of points at low x-values (near 0).
