Hokkaido

This line plot displays the number of days where the 2m temperature decreases by 5 or more degrees Celsius over a 4-day period for the Hokkaido region. The x-axis represents the number of days (0 to 4), and the y-axis represents the count of days (0 to 100). Three categories are shown: red (top), blue (middle), and purple (bottom). The red series shows a general increase from day 0 to day 3, peaking at approximately 85 days. The blue series shows a general decrease from day 0 to day 4, starting at approximately 55 days and ending at approximately 35 days. The purple series remains relatively stable, starting at approximately 45 days and ending at approximately 40 days.

Day	Red (Days)	Blue (Days)	Purple (Days)
0	~45	~55	~45
1	~55	~45	~45
2	~65	~40	~40
3	~85	~35	~40
4	~85	~35	~40
