Death rates by state fitted by month 1981–2009 against t2m days_increasing_by_5 : Women 25

This line plot, titled "Hokkaido", displays the number of days where the 2m temperature is increasing by 5 degrees Celsius over a period of 4 days. The x-axis is labeled "t2m days_increasing_by_5" and ranges from 0 to 4. The y-axis represents the frequency of occurrences, ranging from 0 to 100. The plot shows a distribution of data points at each day, with lines connecting the values for each individual observation across the 4-day period. The data points are colored in shades of blue, red, and purple, and the lines are colored in shades of blue and red. The plot shows a general trend of increasing frequency as the number of days increases, with a peak at 2 days.
