Death rates by state fitted by month 1981–2009 against t2m days_decreasing_by_5 : Women 0

The figure is a line plot titled "Ehime". The x-axis is labeled "t2m days_decreasing_by_5" and has major ticks at 0, 1, 2, and 3. The y-axis is unlabeled. The plot shows a large number of data series, each represented by a line connecting points at x=0, x=1, x=2, and x=3. The points at x=0 are densely packed, while the points at x=1, x=2, and x=3 are more spread out. The lines are colored in shades of red, blue, and purple. Some lines show a significant increase from x=0 to x=1, while others show a decrease or remain relatively flat. The lines at x=2 and x=3 are more horizontal, indicating a slower rate of change for those series.
