A horizontal bar chart showing the distribution of 100 data points across twelve months. The bars are colored by month: Jan (blue), Feb (dark blue), Mar (purple), Apr (light blue), May (teal), Jun (green), Jul (light green), Aug (yellow-green), Sep (yellow), Oct (orange), Nov (red-orange), and Dec (red). The bars are stacked vertically for each month, with the total height of the stack representing the cumulative value for that month.
